

“The moral values featured in this book reflect the exact and true cultural values of our country.” – Religious Scholar and Leader

Helping Iran with LRH Books

Opening the doors of Iran for L. Ron Hubbard® Technology

Iran has a population of over 77,000,000 people and its culture dates back to more than 6,000 years.

Following initial meetings at the Frankfurt International Book Fair in 2013, a delegation from New Era Publications International travelled to Iran to introduce LRH® books to opinion leaders of this country.

Twelve important opinion leaders of the country were introduced through *The L. Ron Hubbard® Series* within the first days and the response was simply fantastic.

One religious scholar and leader stated: *“The Way to Happiness is made for Iran, we need it very much in this country. The moral values featured in this book reflect the*

exact and true cultural values of our country and I want to help to make this book available to all Iranians.”

He continued by stating that he will help to integrate *The Way to Happiness* into the culture of Iran.

The beginning books of *Dianetics®* and *The Way to Happiness* got the official approval to be distributed in Iran.

Libraries in Iran are an integral part of every cultural centre and are essential for people who are seeking knowledge. One set of L. Ron Hubbard’s beginning books were approved to be distributed in over 3,000 libraries in Iran. With that action, millions of people of Iran will be able to benefit from the knowledge contained in these works and thus will enrich the culture and education in Iran.

Meeting with executives of the Cultural Centre of Tehran.

Facts & Figures about Iran:

- Iran has a population of 77 million. The capital city is Tehran with 14 million people.
- The Iranian population is very spiritual and open to self-improvement.
- Education in Iran is highly centralized. It is supervised by the Ministry of Education and higher education is under the supervision of the Ministry of Science and Technology. The adult literacy rate in 2008 reached 85.0% which is a strong improvement from 36.5% in 1976.
- Iran is a very diverse country, consisting of many different religious and ethnic groups that are unified through a shared Persian language and culture.

Iranian professor (right) being introduced to L. Ron Hubbard and the full *L. Ron Hubbard Series*. He was so interested after the presentations that he helped to organize other meetings with top opinion leaders in Iran. He as well requested a copy of every single translated L. Ron Hubbard book in Farsi, so that he can study and learn more about the tech.
