DEPARTMENT 20—DEPARTMENT OF SPECIAL AFFAIRS

The purpose of the Department of Special Affairs is to accomplish total acceptance of Scientology and its Founder throughout the area. It is headed by the Director of Special Affairs. Its awareness level is **EXISTENCE**.

This department handles external affairs to safeguard the org against any outside interference. All legal, governmental or tax matters either by mail, phone calls or visits are always and exclusively routed to the Department 20 of the org. Its personnel are trained to handle such matters and this also prevents possible enturbulation from spreading on org lines busy with the delivery of Dianetics and Scientology.

Department 20 also makes sure that the org is properly incorporated and that all copyrights, trademarks and patents of Scientology are properly registered and protected in the state or country.

By safeguarding the org's status and position, Department 20 makes it possible for the rest of the org to get on with it. It protects the org from the confusions and enturbulation of the surrounding world so the organization can dedicate itself to the promotion and delivery of auditing and training and set people free.

The Department of Special Affairs not only helps the org by protecting it, it also creates and maintains excellent public relations with the community and media. It carries out public relations programs and actions that create acceptance and goodwill for the org and Scientology as a whole.

Finally, the Department of Special Affairs takes responsibility for cleaning up the rotten spots of society in order to create a safer and saner environment for Scientology expansion and for all mankind.

Its valuable final product is:

HANDLED SITUATIONS WHICH RESULT IN THE TOTAL ACCEPTANCE OF SCIENTOLOGY AND ITS FOUNDER THROUGHOUT THE AREA.

Re : FREQUENT FLYER CLUB HAT

Dear Sir,

Here is the data on how you do this. Please save for future reference.

- 1) Have to hand the full name, home address (including zip code) and phone number of the subject. *TWA may also ask for the SS # and DOB of the person).
- 2) Call the frequent flyer number. Some airlines have special numbers to call separate from the reservation numbers. Some handle both on their reservation line.
- 3) Call up and just say you want to check your FF mileage. Just start in giving your name and address as per #1. If asked for the FF number just say you don't have it right there. I found only one airline that could not enter into the data on computer without the FF Acnt # (Continental).
- 4) Ask for the total mileage you have and ask for the most recent trip they have on record for you.

Here are the airline numbers:

NORTHWEST	(213) 380-1511	(Reservations & FF both)
US AIR	1-800-872-4738	(seperate FF number)
DELTA	(213) 386-5510	(reservations and FF both)
TWA *	1-800-325-4815	(seperate FF number)
SOUTHWEST	1-800-445-5764	(seperate FF number)
AMERICA WEST	1-800-247-5692	(reservations & FF both)
AMERICAN	1-800-633-3711	(reservations & FF both)
UNITED	(213) 772-2121	(reservations & FF both)

1-800-421-4655

CONTINENTAL (213) 417-8008 (reservations & FF both -- won't
give any FF data without the FF #)

RE: CAN

Dear Frank,

Please locate the probate case for Stephen G. Doig, Jr. This is Coates father who died in Florida (don't know which city) at age 76. He died on 24 March 1985. He was possibly married to a woman named Dorothy E.E. Wolf. We want to find her as well. I need all factual data from the probate case and copies of any documents that look to be of any use.

I also need a transcript from a divorce case filed in Okaloosa County, Florida. This was a divorce proceeding in which Cynthia Kisser testified as an expert witness on The Way. We need a copy of a transcript of that testimony. This case number is 85-927. The case title is Judy Rogers vs. Cecil D. "Bill" Rogers. I heard that this case went to a higher appeals court where some aspect of the case was reversed. This will need to be tracked down as well as the reversal may DA Kisser's testimony in some way.

Roger

*Frankie,
It looks like this landed in someone's

RE: DATA NEEDED PSYCH
DEAR SIR,

WE ARE CURRENTLY WORKING ON A VERY HOT CASE HERE IN VANCOUVER, AND WE NEED YOUR HELP TO EXPOSE A PSYCH WHO HAS SEXUALLY ABUSED A PATIENT FOR OVER 14 YEARS. HIS NAME IS RONALD ALLAN REMICK, HIS WIFE'S NAME IS JUDITH, THEY WERE MARRIED WE BELIEVE IN FLORIDA, IN JUNE OR JULY OF 1970, IN A JEWISH CEREMONY. WE NEED TO FIND HIS WIFE'S MAIDEN NAME FOR WE BELIEVE HE HAS ACCOUNTS IN HER NAME OF BUSINESSES IN HER NAME SOME MAYBE IN FLORIDA. THIS PSYCH IS ALSO INTO EXPERIMENTAL DRUGS, AND HAS A BIG SAY IN WHAT IS ALLOWED INTO CANADA. HE DID A LOT OF EXPERIMENTS WITH PROZAC, AND THE CANADIAN GOV'T LISTENS TO HIS ADVICE ON WHAT PROZAC SHOULD BE USED HERE. HE IS NOT A CANADIAN BUT HOLDS HIS AMERICAN CITIZENSHIP AND GOES TO FLORIDA TO STAY WITH HIS MOTHER-IN-LAW AND GOES TO OHIO, THE STATE HE IS FROM, TO RETAIN HIS CITIZENSHIP AS AN AMERICAN. HE IS CURRENTLY WORKING ON GENETIC PSYCHIATRY, HE ALSO GOES ALL OVER THIS PLANET GIVING LECTURES ON HOW MANIC-DEPRESSIVE PEOPLE BENEFIT FROM ECT AND HEAVY DRUGS. HE IS NOT WHAT YOU WOULD CONSIDER A VERY NICE PERSON. WE FEEL HE MAY BE PLANNING ON MOVING BACK TO THE U.S. AND WE HAVE TO GET CRIMINAL CHARGES LAID AGAINST HIM AND A CIVIL SUIT BEFORE HE MANAGES TO LEAVE. CAN YOU PLS ADVISE WHETHER THE DATA ON HIS WIFE'S MAIDEN NAME CAN BE FOUND SO WE CAN DO FURTHER RESEARCH HERE? THANK A LOT FOR YOUR HELP.

Investigations Checksheet

FRANK OLIVER
INVEST OFFICER/MM

Purpose:

To educate the Volunteer Minister in the knowledge of how to logically investigate, and therefore be able to find the real WHY for non-optimum situations in life, businesses and organizations and handle them.

- a Study Section 1 Logic.
- b Study Section 2 Investigatory Procedure.
- c Study Section 3 Narrowing the Target.
- d Drill: Find an area of upset, disorder or downstats and narrow the target so as to put in order.
- e Study Section 4 Summary of Out-points.
- f Study Section 5 More Out-points.
- g Study Section 6 Out-points, More.
- h Drill: Make up at least three examples of your own for each of the types of out-points.
- i Study Section 7 The Real Why.
- j Study Section 8 The Why is God.
- k Drill: Demonstrate the difference between an explanation and a right why.
- l Drill: Isolate a situation (such as the instance in the photo sequence of the empty restaurant) and find the right why that leads to a recovery of statistics.

	7/1/91
	11/20/91

- m Study Section 9 The Product as an Overt Act.
- n Drill: Visit a store and find an overt product from an assembly line of items, like cards, clothes, tools, etc.
- o Study Section 10 Organization Misunderstood.
- p Drill: Look up each of the basic organizational terms listed in the glossary at the back of this book or in your regular English dictionary. Use them in sentences until you are certain you understand them.
- q Drill: Using your demo kit, demonstrate how organizational misunderstood words can cause management and production failures.
- r Drill: Find an associate who is not doing well at his job, find out what word connected to his job he doesn't fully understand, and get it cleaned up with a good dictionary.
- s Study Section 11 Third Dynamic De-aberration.
- t Drill: Make up an admin scale for your own first dynamic.
- u Drill: Make up an admin scale for a friend or relative's second dynamic.
- v Drill: Make up an admin scale for a friend or relative's third dynamic.
- w Drill: Debug points on the above drills as needed.
- x Study Section 12 Group Sanity.
- y Drill: For each of the 11 points of success and failure, demonstrate what a group would be like when these points are out and then go in.
- z Study Section 13 Organization & Morale.
- aa Drill: Find a person with low morale and raise his morale.

Handwritten notes and signatures in the right margin, including dates like 11/20/91, 12/13/91, and 1/13/91, and initials.

17. DRILL: Have another student take the role of a government agent who has arrived in the org. The org is building a new Test Centre down town and he is charging the org with some reported violation of zoning regulations. Drill the exact steps you would take to handle the immediate charges being made. The coach is to make up other examples as needed. Flunks are given for any incorrect handling or uncertainty of the student on how to handle the situation, referring the student to the exact LRH material being violated. This drill is passed when the student can effectively handle any allegation put forward by the coach.

- 1. TOTAL UNHANDLED ATTACKS AND ATTACKERS (GDS)
 - Ref: Advice undated RE GUARD STAT
 - Advice 27 March 72 COUNTER ATTACK TACTICS
 - Advice 28 March 72 INTELLIGENCE PRINCIPLES

This is a guard stat with 0 at the top.

This stat is counted:

1 point for every attacker

Plus:

1 point if the attack is local

2 points if the attack is regional

4 points if the attack is national

The points remain on the stat until handled.

The category of attacks are listed below:

- 1. TM Infringement, each TM Infringement counted as per the TM Infringers handled stat of Invest. (NOTE: If a report is received of a possible TM Infringer, this must be verified as inactive within 4 weeks or it gets counted on this stat as a TM Infringer until verified as inactive or until handled.)
- 2. External Influences - where an org is being influenced by External Influences and this is not handled by OSA. Also each External Influence who has not been handled. This would include any actions done by TM Infringers which affect the org or the field.
- 3. A suit filed against a Church entity or individual.
- 4. Any lost suit.
- 5. A print media hit - a newspaper or magazine story which is an attack.
- 6. An attack on the TV by an individual eg. an entheta source who has gotten on a TV talk show to forward an attack, or on a radio show.
- 7. A TV program that is an attack on the Church.
- 8. Legislation proposed in any area that hinders our operations in that area.
- 9. Legislation passed in any area that hinders our

operations in that area.

10. An ontheta book published.

11. Any legislative or governmental inquiry initiated into the Church.

12. Any Scientology activity closed down through opposition actions.

13. Government restrictions imposed upon the Church.

14. A legal case not involving the Church but resulting in a judgment that is an attack upon the Church.

15. A civil suit filed on the Church.

16. A civil judgment against the Church.

17. A deprogramming attempt on a Scientologist.

18. A penal (criminal) complaint against a Church or a staff member filed.

19. A penal (criminal) complaint against a Church or a staff member being acted on.

For every attack, the attack goes on the stat with a point value according to whether it is a local, regional or national attack plus the attacker behind the attack goes on as an additional point if not already on the list.

When the actual situation is HANDLED, by terminatedly handling the attacker the points come off the stat (one attacker may be behind a number of attacks and when handled, the accumulated points for the attacks originated from that person would all come off the stat). The exception would be if an Attacker is verified as being handled yet an outstanding attack still exists in some form, that attack remains on the list until handled (while the Attacker and any handled attacks come off the stat).

Clearly, the Attacker MUST be correctly isolated and named before he can be handled and this stat goes up.

For purposes of calculating the list of UATTACKS to begin with, each DSA Invest Officer should list out the major attacks connected to each of its current attackers going back to the point when they started attacking (in many cases this can be several years or even a decade - for the initial calculation of this stat it is not intended to get into a huge administrative cycle and some approximation of attacks based on existing file data may be necessary). Each attack will have to be classified as to whether it was a local, regional or national attack for purposes of calculating the stat.

Each DSA Invest Officer is to format their UATTACKS breakdown by listing out the names of the attackers with the attacks under each name, with the attack designated as to whether it was a local, regional or national attack. The attacker with the most attacks should go at the top of the list. The purpose of this admin system is to be able to see at a glance who we are getting the most attacks from. If there is more than one attacker behind an attack, then that attack would be placed under the name of the major attacker with the name of the second attacker in parenthesis next to the attack so it is clear that the attack would not come off the list until both attackers are terminatedly handled. If the major attacker gets terminatedly handled, the attack would then be placed under the name of the second attacker.

If there are attacks for which there are no known attackers, these are placed at the end of the list until the attackers behind them are known.

Following is an example to illustrate this:

- 1) JOE BLOGS = 1 POINT
- A) LA TIMES ENTHETA ARTICLE 15 JAN 1980 - REGIONAL = 2 POINTS
- B) ENTHETA TV APPEARANCE 1 MAY 1982 - LOCAL = 1 POINT
- C) ENTHETA BOOK "CULTS" 1984 (FRED FRAME ALSO BEHIND IT) - DISTRIBUTED NATIONALLY = 4 POINTS

Subtotal = 8 POINTS

- 2) FRED FRAME = 1 POINT
- A) ENTHETA LECTURE BOSTON UNIV 15 DEC 1983 - LOCAL = 1 POINT
- B) DEPRO ATTEMPT ON SUE SMITH MARCH 1984 - LOCAL = 1 POINT
- C) 14 MEDIA ATTACKS 1976-1980 - ALL REGIONAL = 28 POINTS

Subtotal = 31

ATTACKS WITH NO KNOWN ATTACKERS:

- A) 12 JUNE 1981 RAID ON MISSION - LOCAL = 1 point
- B) JULY 1987 ATTEMPTED DEPROGRAMMING ON BILL SMITH - LOCAL = 1 POINT

Subtotal = 2

Etc.

Once formatted as per the above, each DSA Invest Officer should forward this breakdown to the OSA Cont where a master Continental list of UATTACKS will also be kept and updated. Each cont should have a break down the UATTACKS by the DSA office responsible for handling each attack/attacker.

2. NUMBER OF ATTACKS PREDICTED AND REPORTED PLUS WHOS FOUND BY APPROVED ESTIMATE OR EQUAL. (GDS)

Ref: Dispatch RE: NEW STAT
 OSA MW ORDER 42 INTELLIGENCE, ITS ROLE
 OSA MW ORDER 35 INTELLIGENCE, ESTIMATIONS AND PREDICTIONS
 HCO PL 17 FEB 66 PUBLIC INVESTIGATION SECTION
 Advice 28 March 72 INTELLIGENCE PRINCIPLES

This stat is a weekly point value for the total number of threatened attacks found by Defensive minus points for any unpredicted attack or any attack which has been predicted which then goes unhandled and occurs despite the prediction. The stat is not accumulative. The points are valued as follows:

Local Attack - 1 point
 Regional Attack - 5 points
 National Attack - 10 points

An unpredicted attack, or unhandled predicted attack counts minus 10 times the above point value.

An attack is defined per the definitions of an attack as covered under the UATTACKS statistic.

A bonus of 10 points is given for any Who found by AUC approved evaluation and 5 points for a Who found by approved estimate.

As can be seen, for a prediction to be viable it must be predicted in sufficient time to handle the matter before it becomes a full blown attack and a handling must be worked out and exchanged. The actual handling may be executed by Support Unit, Staff Security Sub-Unit, HCO, Dept of I&R, Legal Off or PR Off, but the Defensive Unit is responsible for ensuring that the prediction product is actually of quality and exchangeable and utilized to beneficial result of preventing the attack.

To be counted, the prediction must be reported in writing in some manner to the proper publics who should know and/or act on the data (which reporting may even be in the form of a stat breakdown if it is clearly communicated in an exchangeable manner with sufficient time, place, form and event to be understood.)

The stat reflects external prediction as well as internal prediction lines.

Internal prediction activities must be aligned with the purpose and functions of the Office of Special Affairs and Departments Of Special Affairs, which are external facing units. It is the Staff Security Sub-Unit that monitors the prediction and handling of matters which interface between internal and external. The Department of Special Affairs is interested in matters which if not handled could result in external attacks, different from security situations which are simply an HCO matter - for example a PTS Type A situation which just needs to get a standard handling (and would concern us only if there are enemy connections or indicators of something that will turn into an external attack unless handled); whereas a PTS C found on lines would of course be of interest to us. Valid Staff Security matters include such things as detection and handling of enemy infiltration; detection and handling of the source of external influences preying on the backs of orgs, etc.

Key references on Staff Security functions and duties and areas of prediction activity which would validly be represented on the WHOATTACKSF stat, and which delineate matters which are the hat and function of HCOs are:

This stat is a guard stat and is the total outstanding threats. This would cover any predicted attack about which information has been received. Once the threat is handled it comes off the stat.

4. NUMBER OF OUTSTANDING SECURITY THREATS (GUARD STAT)
Ref: Advice 16 Feb 82, NEW STAT

This stat measures the total amount of outstanding security threats and risks and is an upside down graph with zero at the top. A security situation for OSA/DSA is as defined under the WHOATTACKS Found stat.

5. NUMBER OF THREATS SEEN, THREATENED OR REPORTED
Ref: Advice 16 Feb 82, NEW STAT

Per the above listed advice, this stat shows the amount of security threats that are found and reported. A security situation for OSA/DSA is as defined under the WHOATTACKS Found stat.

6. NUMBER OF THREATS HANDLED

Per the above listed advice, this stat shows the amount of threats that are handled.

7. COMPLAINTS ACTED UPON
Ref: HCO PL 17 Feb 66 PUBLIC INVESTIGATION SECTION

This stats measures the number of complaints against attackers that were acted upon by authorities.

This is defined as the number of complaints filed with anyone who is in a position of authority and acts upon the complaint and thus impinges on an attacker (e.g. judicial, governmental, civil, employer, landlord, etc). Each time the complaint is acted on counts 1. Not cumulative.

8. NUMBER OF OPPOSITION ADVANTAGES LOST
Ref: HCO PL 16 Feb 69 Iss 11, BATTLE TACTICS

This stat measures the advantages of the opposition which were lost due to the application of standard Invest tech.

Total number of advantages lost by the opposition that weak as a direct or indirect result of Invest actions. See the above HCO PL for a description of the type of activities that would count on this stat. Not cumulative.

DEFINITIONS:

OPPOSITION: A person or group actively opposing the Founder, Scientology or the Church of Scientology or its principles or activities and/or threatening its survival or expansion.

9. DOCUMENTED EVIDENCE OBTAINED AND USED
Ref: HCO PL 17 Feb 66 PUBLIC INVESTIGATION SECTION
Advice 8 June 73 INTELLIGENCE, ITS ROLE

This stat measures the evidence that has been obtained against attackers and was put to use.

Documented evidence obtained that indicates a crime or useable evidence regarding a Who or an opposition terminal, and is deemed useable by counsel, PR or Legal.

This stat is counted on the basis of one point for each evidence of a crime documented deemed useable by counsel, PR or Legal.

A 5 point bonus is given for each piece of documented evidence that is USED by counsel, PR or Legal. (If the data contained in the documented evidence is used, it can

still be counted as a DOCEU, whether the actual document is used or only the data.) Not cumulative.

HCO ASSISTS ME EVERYWHERE in wearing any of my own hats. One of those hats (whether we like or not it is forced on us) is Justice.

People come to me with ethical problems with their auditors, their husbands, their wives, their bosses. I always try to listen – always try to help.

People get in trouble with the law – without aiding crime, I try to help these people square themselves with the police.

Judges and others have paroled people to me without my asking and have told people to get processed or go to jail.

People attack Scientology; I never forget it, always even the score.

People attack auditors, or staff, or organizations, or me. I never forget until the slate is clear.

All these things add up to a Justice Hat. Whether I would or no, I wear it.

HCO Secretaries therefore are often faced with "Justice Problems". They should recognize them as such and handle them as far as they can.

"Bring Order" also means Bring Justice. There's precious little real justice in the world today. So we ourselves should make a start.

Normally I run on the stable datum "Keep the peace and keep them happy". That's for run-of-the-mill disagreements amongst people.

But always I try to adjudicate on the basis of the Optimum Solution, "The Greatest Good for the Greatest Number of Dynamics".

But to do these things one should have some understanding of Justice itself.

Most executive failures are (1) failure to help staff and (2) failure to understand and use the principles of justice. We should not fail in these matters.

JUSTICE SUBDIVIDED

The whole subject of justice subdivides for a Scientologist into four phases. There are

1. Intelligence Activities
2. Investigation of Evidence
3. Judgment or Punishment
4. Rehabilitation.

INTELLIGENCE

Intelligence is mostly the collection of data on people which may add up to a summary of right or wrong actions on their part.

It is basically a listening and filing action. It is done all the time about everything and everybody. Then one day some random data make a summation that can be used. "It all adds up." But if one never collected data, there would be nothing to add up. Hence, intelligence consists of noting data about the activities of people from all kinds of sources. Joe is now working for the *Daily Worker*. The State Department won't grant Pete a passport. Isabel left Texas owing money. It's all grist to the mill of intelligence. Carefully remembered or filed and cross-indexed, such data tells its own story some day. If we had a folder for Joe, we'd scribble on a slip of paper, "Works now (1959) for Daily Worker - a Communist paper". A few weeks later, another scrap of paper is dropped in: "Taking B. Scn. Course Feb. 59". A few months later: "Joe moved in to live with Pete". We look up Pete. Obviously, Pete is a Commie as he can't get a U.S. passport. September 1959 we learn that Joe is asking for a job in the Seattle Office. We promptly tell Seattle, "Rat-poison. Forget Joe."

If we kept files like that we'd keep them like that. Some day we may have to. Today we do it by memory. So we listen. We add up associations of people with people. When a push against Scientology starts somewhere, we go over the people involved and weed them out. Push vanishes.

Using intelligence to tell our friends from our enemies and acting fast is *why* we have stable organizations now where we had shambles before. It *isn't* better organization so much as more peace bought by more alert intelligence. We know our enemies before they hit. We keep them out of important positions. When we accidentally put one into a key post and he starts to flub, we shoot quick and get judicial afterwards. And we then add up who his friends and associates were.

Intelligence alertness, even when we have no files, pays off in peace, growth, and progress.

APA and OCA graphs tell their stories on people. *Only* the ones whose graphs don't change under processing have been found to be real menaces to Dianetics and Scientology. They have overt acts and bad intentions against us and they *can't* talk to the auditor about them, they feel. So they're hanged. Every one of twenty known cases who were evidently paid money to smash Dianetics or Scientology organizations, including Hart, Purcell, and van Vogt, had hung graphs. No change occurred in any of these cases for five or more years of known activity, despite all processing! So an unchanging profile over years of processing almost adds up to "dangerous person - has bad intentions toward Dianetics and Scientology".

Conversely, people who benefit from processing or auditors who get consistently good results on preclears never get snarled up enough to attack us. Therefore intelligence has its bright side. By facts heard plus profiles *seen*, we know our friends.

Intelligence is therefore that activity which collects data and keeps it adding up so that we know our foes from our friends and so that we can act to separate out the sources of trouble in any given situation.

Organizations with bad consciences usually look on HCO personnel as intelligence people. So HCO personnel might as well realize it, too. One small HCO hat is Intelligence – know our friends and our enemies and what they are doing.

INVESTIGATION

When things go wrong and we don't know why already by intelligence, we resort to *investigation*.

When we need somebody haunted we investigate.

Investigation is the careful discovery and sorting of facts. Without good investigation we don't have justice, we have random vengeance.

When we investigate we do so noisily always. And usually mere investigation damps out the trouble even when we discover no really pertinent facts. Remember that – *by investigation alone* we can curb pushes and crush wildcat people and unethical "Dianetics and Scientology" organizations. It's almost funny. We sometimes learn nothing useful and yet because people heard we were investigating their consciences sent them into headlong flight or sudden collapse. There's power in the question alone!

Here is an example. There's bad morale in a central organization. We don't know why. We try everything we can to up units and ease difficulties and yet there's bad morale. So we investigate noisily. Remember, intelligence we get with a whisper. Investigation we do with a yell. Always. Modern cops don't really know this. They investigate with whispers. Doesn't pay. Why sneak up when pouncing is the only thing that serves us? After all, if it hasn't been whispered to us already and we have to investigate, why keep whispering?

In the low morale matter, we think over the most likely suspects and summon them to see us. We ask them why they're talking the way they are. What's wrong anyway? We call them in one at a time. We use the E-meter. "What have you been doing to us?" And you sort it out. Investigation to us in Scientology is a fine art. It's like auditing. If they won't take a meter test, you know they're guilty. If they do, you can watch that needle dip a "Yes" every time you're right *even when the suspect won't say anything verbally*. You generally find that Joe is hoping to start a clinic in the town and thinks of the organization as a rival – if the central organization got knocked out, this knucklehead thinks, he'd be all set. So he's been discouraging staff and starting rumours in the town.

Did you ever realize that any local viciousness against Scientology organizations is *started* by somebody for a purpose? Well, it is. Look at what we do. Look how dedicated staff is. How hard they work. And yet somebody feels we're evil? No, rumours aren't "natural". When you run them down you find a Commie or a millionaire who wants us dead and his own clinic up or a group member who is also a member of the R.C.

You don't rest when bad rumours are about. You investigate, you run them down. You find amongst all our decent people

some low worm who has been promised high position and pay if we fail. Don't discount this. In one instance \$500,000 was paid in cash to a man to wreck Dianetics. He almost made it. Wichita, Kansas, Spring 1952. (But by intelligence and investigation we cost him his shirt and his spare vest as well.)

In cross questioning people, it is as valuable to know what they've been told as what they've said. "What bad things have you heard about the HASI?" and "What have you said?" are the usual questions. When you get on a line of data follow it right through.

Get the *names*. Write them down as you get them. Sort them out with what you already *know* about them.

Also, even in daily actions, remember this: never let *anybody EVER* say to you "Everybody says" or "Everybody thinks" or "The field thinks". Demand at once *who, when, where, and what*. "Everybody" turns out to be some nut most people would laugh at and "the field" becomes one sour grape that flunked his HPA two years ago.

In the first place, the mail even as a whole does *not* reflect field opinion ever. It's only the opinion of people who write in — and that's only a small part of the field.

Never permit a source of entheta to be generalized. If it's entheta, you want *who, what, where, when*, and you write it down and file it.

The whole field less one man could be wildly for you but staff can believe this silly fool is PUBLIC OPINION.

Public opinion isn't newspapers or magazines or letters. It is *attendance, balance sheets, book sales*.

Therefore investigation must always be aimed at the specific person, the time and the place. Else you'll sink in a morass of generality and get nowhere.

When you have found your culprit, go to the next step, Judgment and Punishment.

Investigation by Outside Sources

Overt investigation of someone or something attacking us by an outside detective agency should be done more often and hang the expense. It's *very* effective. Often investigation by a private detective has alone closed up an entheta source or a squirrel organization. In fact at this writing I can't remember a time when it hasn't!

The reason for this is simple. Of twenty-one persons found attacking Dianetics and Scientology with rumours and entheta, eighteen of them under investigation were found to be members of the Communist Party or criminals, usually both. The smell of police or private detectives caused them to fly, to close down, to confess.

Hire them and damn the cost when you need to.

Press and other queries are counter-investigation.

Never spook if investigated. And don't co-operate. Sit tight. Be silent. Make the investigator talk. Gradually put him into session if you can. Put him in birth or get him three feet back of his head. But don't co-operate or volunteer data. It's not that you've anything to hide. It's just that investigators can't duplicate. They pervert things they "hear".

Your whole answer to anyone is. "This is an institution that has a definite high standing throughout the world. Why don't you see our attorneys?" This kills press and cops alike.

I've seen an outside investigation of a guiltless organization put the whole place in a flap and cost it two days' work or more. I've seen an organization fall apart by suspending operation for ten days while it permitted itself to be investigated. So don't co-operate. If you don't scare or cringe, the menace fades away.

People feel when they're investigated they must have done something wrong even when they haven't. If it's wrong to honestly help people then we're wrong – not otherwise. So never spook.

JUDGMENT AND PUNISHMENT

None of us like to judge or to punish. Yet we may be the only people on Earth with a right to punish – since we can undo the damage we do in most cases. Therefore never punish beyond our easy ability to remedy by auditing and restoration.

Judging must be done on the basis of clear-cut evidence and the person to be guilty must be guilty *beyond reasonable doubt*. Only then, punish.

Guilt is established by a person's actions and statements, by witnesses and written evidence and by an expertly run E-meter. A person can be guilty without realizing he did wrong. What criminal ever does realize how wrong his actions are?

Points to Establish

1. What is the crime? This must be established first. It must be something that can be phrased in a sentence or two. It must be unacceptable to the general good of all. It must contain actual injury to someone or something. And the criminal is usually rewarded in some fashion by someone or even by perverted satisfaction.

2. Who is guilty of the crime? Is it the person himself or an associate he aided? An associate or even a silent non-participant who knew but didn't warn the victim can be judged guilty of the crime.

3. Who are the accusers? In this case it is usually us. But you'll get ethics cases where it is another. What do they accuse the person of?

4. Who are the witnesses? Crimes don't always have witnesses but when they do, it helps to question them. Witnesses are no whole answer to anything. They lie, they don't observe well, they have prejudices. But some weight can be given to their testimony. They can almost be safely omitted if you're in a hurry and have an E-meter.

Procedure on Entheta Press

In the case of a bad magazine article which is signed, use the following procedure:

1. Tell them by letter to retract at once in the next issue.
2. Hire a private detective of a national-type firm to investigate the *writer*, not the magazine, and get any criminal or Communist background the man has. (Because all subversive activities foolishly use criminals they "have something on" and men who have been paid to attack us, you'll have data incoming from the detective agency if they do their work well.)
3. Have your lawyers or solicitors write the magazine threatening suit. (Hardly ever permit a real suit — they're more of a nuisance to you than they're worth.)
4. Use the data you got from the detective at long last to write the author of the article a very tantalizing letter. Don't give him your data on him. Just tell him we know something very interesting about him and wouldn't he like to come in and talk about it. (If he comes, ask him to sign a confession of collusion and slander — people at that level often will, just to commit suicide — and publish it in a paid ad in a paper if you get it.) Chances are he won't arrive. But he'll sure shudder into silence.
5. Give any new data you have from the detective to your attorneys for their use against the magazine.
6. Don't let the whole matter disrupt you, take much time, or upset the central organization.

Investigating a Squirrel

A person or an organization using Dianetics or Scientology wrongly or without rights, or a wildcat magazine, is best shut down or shut up by hiring a private detective. Tell the detective "We don't care if they know you're investigating them for us. In fact, the louder the better."

Detectives cost dozens of dollars or pounds. They save thousands.

When you get their data, give it to your attorneys for any action they want. Or post it.

When to Sue

Never if you can help it. It consumes time, means little but trouble for you. Suits are basically best as threats.

When Being Investigated

If *you* are being investigated or if the Central Organization is — sit tight, don't co-operate.

Be legal according to the laws of the land in the first place. After that kick investigators or reporters downstairs.

Press interviews usually end up as entheta or they are cover-ups for an investigation. *Never* co-operate. Be indifferent. Don't let the central organization co-operate with "press" *ever*. That's a lesson hard to learn. Press people are *so* persuasive. They are going to "help" so much. Look at a newspaper. Is it helping anybody?

5. What happened? This is so important that most trials spend much of their time on it. It is ridiculous sometimes how prejudice and vengeance and plain lack of the ability to confront confuse the story. "Getting the facts" is a police idea of investigation. They seem more interested in the script than in what crime and who did it. To speed evidence, be a good auditor – question closely and rapidly. What did he or they do or say and where?

6. Weigh the evidence and decide if the crime was actually committed and by whom.

7. Establish the importance of the crime in terms of damage done or threatened.

Punishment

Our punishment is not as unlimited as you might think. Dianetics and Scientology are self protecting sciences. If one attacks them one attacks all the know-how of the mind. In caves the bank. It's gruesome to see sometimes.

At this instance there are men hiding in terror on Earth because they found out what they were attacking. There are men dead because they attacked us – for instance Dr. Joe Winter. He simply realized what he did and died. There are men bankrupt because they attacked us – Purcell, Ridgway, Ceppos.

So punishment almost takes care of itself. However, there is an immediacy necessary at times in some matters which makes punishment necessary.

Where a certified auditor attacks the central organization or flagrantly breaks the code, punishment is simple: suspend his certificates. Any HCO Secretary has authority to do so.

Where an employee acts in a corrupt or bad fashion, fire him or suspend him or her.

When a squirrel organization sets up, suspend the certificate of everyone who joined it. Cancel the certificate of the person who started it.

Use civil authorities when absolutely necessary, as in embezzlement or mayhem, but try to operate without calling in local law. We always do better ourselves or with private detectives. Local law today means reporters and cases tried in the press. Keep our name good.

And always punish quietly but publicly. Post it on the Public Board for a day. Never put it in a magazine or write the field letters about it.

Remember this: we are a theta line. Leave the entheta to others. Act on entheta but don't add to it. Remember, orderly justice as described in this booklet also brings order. Be as happy if they're innocent as if they're guilty. But don't neglect rumours, squirrel organizations and publications or Commie or criminal personnel. Be just. Don't ordinarily put a head on a pike unless it's the right head. But remember that there *are* times when it's vitally necessary to put some head, any head, on a pike to quell rising disorder. Just remember that justice is an action to deter disorder and secure the public safety. But if you *do* put the wrong head on a pike, be sure to put it back on the body again as soon as the need for its being on a pike is over. Justice is not always the matter of an individual. It is a short-term method of bringing order and it is needed for all dynamics.

REHABILITATION

Rome destroyed herself by failing to follow (or know) the necessity of rehabilitation. Russia is caving in for the same lack. Every modern nation at this writing makes more criminals that it captures – hence Hitler's criminal rise to power.

When you punish a man you punish also his family and friends. Even if you slayed the man you would then still have his friends and family as your enemies. If you slay everyone he knew – why, *they* have friends and families, too – and at last you've a whole populace against you.

You punish a man. He goes away to join the ranks of the squirrels. You swell the opposition. Don't do it.

Shoot the offender for the public good and then patch him up quietly. That isn't even mercy. It's good sense.

The Basis of All Crime

You have to know this about offenders against Scientology, its organizations and people. ARC Breaks can be caused by an overt act against us. If a person does something bad to us (even when we did nothing to him) he now has an ARC Break with us. Without our knowing it he is a little bit of an enemy of ours.

So he now, having an ARC Break, again offends against us. He is more our enemy. And so he goes until at last he can't rest until he kills us dead.

That is the route of crime and criminals. They rob, they hurt. The more they do, the more reason they think they should have to do so. They dream up motivators madly, seeking to justify their acts. This in the field we see as entheta. We do precious little to hurt people. Therefore when they do something against us they have to lie and scream to justify it.

Factually when they start this they're on their way out. Offenders against us get ill because they can never truly justify it.

It is mercy to put the padlock on such a person's activities. Every word he says or writes against us, every plot he enters into, alike push him further and further down.

How bad can it get? We have evidence in a book Dr. Winter wrote. He *knew* it consisted of stolen ideas and entheta lies. Every copy it sold killed him a little more. And one day he died. He couldn't even be audited since he had tried to damn the thing that had *almost* saved him, his marriage, his children.

So it is mercy, not revenge, that prompts our justice. (1) We must not neglect it and (2) we must not fail to rehabilitate.

Put the culprit on the E-meter. Ask him as a repetitive command "What have you done to us?" Cover the HASI, the staff people, HCO, myself, anything you can think of, rephrasing the question each time the last version is flat.

Only when all this is off will what we have done to the culprit free.

If the case is a true criminal case – totally hardened down to no-guilt for anything – you would have to run "Recall a time you have done something" for a long long time before you could release the specific overts against Dianetics and Scientology.

When he's turned loose again he will not try to wreck you. He will have regained his ethic level – providing you balanced the case out with motivators “What has been done to you?”

It's *relief* to a bad case to be punished. Sometimes they choose us for their executioners – worse luck. More often than not you as my representative get selected as the person to wield the axe and a criminal-type will try and try to get you to use an axe on him. It would feel so good to be punished after lives of crime. Axe him – but rehabilitate him too.

Whom to Suspect

Suspect people who have the following:

1. Criminal connections or background.
2. Communist membership or leanings (they attack all “source”).
3. Low OCA/APA graphs.
4. Auditors who get bad results on preclears.
5. People low on the tone scale, particularly physiologically (physiology not always reliable).
6. People who don't pay their bills and who want it all free.
7. People who tell you you could reach so many people if only you'd help them or their friends.
8. Press.
9. People who can't work.
10. People who break up machinery or Mest.

If you simply swept all these out of every central organization, you'd be a real winner. (Never consent to a post being filled with a bad person because the post is empty. An empty post is better than one badly filled, always.)

Whom to Trust

Trust the following:

1. Auditors whose good results you have actually seen on graphs (never by “repute” the “best auditor in town” – this is press agentry not results).
2. People who are able to work.
3. People who get a job done easily.
4. People whose Mest is in good shape.
5. People who are routinely in good health.
6. People whose cases run easily.
7. People with high OCA or APA graphs.
8. People in general.

"The tech of ethics is the actual tech of survival."

INVESTIGATORY PERSONNEL

(SEC ED 254 Int of 26 April 1966.

1. Any non-Scientology person applying for a post in Dept 3 Section 5* must be completely cleared on a "Joburg" and be null on all questions and the HCO Sec must be completely assured the person is both qualified and potentially loyal and without any criminal record or tendencies before the person may be employed in Section 5.

2. By having high-toned investigators who have no possibility of being blackmailed, we can make up in effectiveness what we at this time lack in numbers.

We have discovered exactly who has been shooting at Scientology for 18 years and know all the names. They are a small group with international ambitions, founded by a madman, taken over by a politically ambitious few.

The fight was their fear we would break them financially. If Scientology was the real answer, they would have to cease torturing and killing "patients" and there would go their income.

Well, they have now been hurt bad enough to make them move their HQ.

So the fight isn't all going one way. Press and public sentiment are swinging to our side. And we have not yet mounted a real offensive.

This is turning out to be a bitter and fundamental war. The forces which seek to bring light and freedom to the world - us - have run squarely into the # 1 engram of the planet, kept alive by a dark and secret enemy of Mankind. These insist on torturing or killing the insane.

It is a terrible hypocrisy for them to say we hurt people. Anyone who has "suffered" at our hands is still free, well and able to complain. The victims of the enemy in his institutions are like Hitler's death camps. Their victims can't complain. They can't even talk. They're dead.

It is the age old battle of truth and light against the powers of darkness.

We didn't ask for this fight. We weren't even in the enemy's line of country. We avoided treating the insane.

But they attacked us, for no reason except their own fear. I regret they appointed us their executioners. There are so many other pleasant things to do.

But, with the enemy active in legislatures and the press, we haven't much choice but to fight.

And we have begun to fight.

We have already hurt his morale and finances enough to make him move his HQ.

Our forces are closing in on it again in the new location.

This one we've got to win. We may not have another chance.

PRINCIPLES OF GOVERNMENT

(Originally an undated LRH note. Issued
as an OSA NW Order on 6 February 1988.)

It may be possible to conduct a government without direct taxation of individuals, but by causing the government to engage upon services to the population which obviate the necessity of personal taxation and all the ills to which that is prone. It is highly possible that a government only enters upon individual taxation when its ability to produce service for its citizens has dropped below the point of non-existence.

A government is justified only so long as it serves the people. A business goes bankrupt when it is not voluntarily contributed to. A government goes Fascist.

BLACK PROPAGANDA

(Originally written by LRH on 12 January 1972.
Issued as an OSA NW Order on 18 February 1988.)

Black propaganda is a covert communication of false data intended to injure, impede or destroy the activity or life of another person, group or nation, usually issued from a false or removed source from the actual instigator.

It is used heavily in "psychological warfare."

It is a specialized technology of its own.

It relies chiefly on the technique of "classification" of another or a group or a nation as undesirable or evil.

It has many counter weapons and is itself essentially fragile because it is false.

Dianetics, Scientology and myself for a very long time have been subjected to a very standard black propaganda campaign instigated by trained persons - the AMA in the US, the British Psychological Association in Australia, the National Association of Mental Health in England and internationally.

What is being attempted by black propagandists is to classify us firmly in the public mind by constant repetition of certain words like "cult." The more we let such propagandists do this, the more chance we give them, the more opportunity they have.

A black artist has to be carefully trained to do this and I am suddenly quite interested in such fellows. It isn't just "the way things are written." Such are well trained intelligence pros in the field of psychological warfare.

Psychiatry today advises advertising and propaganda and designed of course this campaign we have experienced.

The subject is even touched on by Dr. Thomas Szasz as a psychiatric technique in his book Ideology and Insanity, page 49, chapter 4, page 53 section IV, page 67 section IX and his whole article "Psychiatric Classification as Personal Restraint", page 190 of the same book. Of these, page 53 section IV is the most interesting in application to this subject of classification.

"Classification is a social act. The classification of individuals or groups entails the participation of at least three different types of

persons: Classifier, Classified, and a public called upon to accept or reject a particular classification."

While Szasz is not using it as it applies to psychological warfare (black propaganda) or advertising, it is nevertheless a key point in psychiatric planning of any campaign.

The AMA counts on this utterly.

So this is their one trick.

To cancel an enemy's chief weapon is in itself a part of victory.

To cease to be the effect of classification and become in our turn the cause of it, the classifier, is to win the propaganda game.

Our propaganda is dirty but it is not black because it is true. Black propaganda is essentially false.

We can do this trick by survey and attack. As what is attacked is already popularly evil, we become re-classified as attackers and the enemy as bad hats as they're for the evil if they attack us.

We won't be running a black campaign as we deal in truth.

Black campaigns ARC break people since they depend on false reports and are thus out-R. Hence your dead agent actions work.

We just run propaganda campaigns.

The objective is to be identified as attackers of popularly considered evils. This de-classifies us from former labels. It re-classifies our attackers as evil people. Which they are.

In the book Black Boomerang by Sefton Delmer (1962) published by Secker and Warburg, London, Delmer gives various formulas of black propaganda used in WW II. They used intelligence to get enough facts to run a convincing but fake "German radio station" from England.

Since WW II psychiatry has moved its techniques into advertising and propaganda and the think of these is in the Szasz references above.

So we

- (1) Seek to avoid opportunities for the enemy to classify us.
- (2) Contest or expose any previous classification as false (dead agency, etc.)
- (3) Engage in a series of campaigns which confuse past classification.
- (4) Achieve for ourselves a dominance in classifying ourselves and others.

Out of this strategic planning can come operating policies and campaigns.

THE GENUS OF INSANE GOVERNMENTS

(Taken from undated LRH notes. Issued
as an OSA NW Order on 17 February 1988.)

Plot a government - any government on Earth today - as
you would plot an individual on the tone scale.

What do you find?

A murderer, a non-producer, a thing unable to run engrams
- in short, an insane person.

Why?

The invention of the "official act" as different from a
"personal act" was the beginning of governments sufficiently
insane to cause war.

Definition of an insane person: An individual who is not
personally responsible for his own acts.

Definition of a public official: An individual who is not
personally responsible for his own acts.

Result: Insane Government.

WHY GOVERNMENT ATTACKS RELIGION

(Taken from an LRH advice of 1979. Issued
as an OSA NW Order on 17 February 1988.)

The factual reasons are:

1. The Roman Empire was overthrown by Christianity and this is deeply engrained in history.

2. Religions force a morality on governments which they would rather not have much to do with. Any religious leaders in the past century and even in the past half century have taken the government to task, amongst them Cardinal Spellman.¹

3. The government knows it can't function without the allegiance of a population. Religious people tend to give their allegiance to God. The government is jealous of this divided attention.

4. Psychiatry and psychology try to bend the will of the people. Both subjects are violently atheistic and can only survive providing they can maintain a monopoly on the control of the minds of children and the population at government expense.

5. Governments fear the arising of a spiritual leader who may lead the population to resist decrees and exploitation. They therefore try to depopularize, blacken the reputation of, or assassinate any potential spiritual leader.

Religious persecution occurs at those times when a government is ruthless and oppressive and seeks total dominance of the citizenry. Since World War II, we have been trying to live with such a government.

WILLFUL FALSE REPORTS

(Originally written by LRH on 21 January 1975.
Issued as an OSA NW Order on 18 February 1988.)

In dealing with governments, one would usually go on the theory that the government has stupidly accepted false information into its files and is riding or leaning on one because of it. This would be a relatively sane interpretation.

However, one cannot rule out another possibility. The government could be willfully manufacturing false reports in order to get rid of somebody.

Thus one can see that a superficial DAing of each false report would wind up as perpetual motion as one is dealing with a lie factory.

The insane covertly execute hidden destructive intentions. By all standards modern governments are not sane.

Thus, somewhere at the bottom of the pile is some hidden intention.

In collecting government files and the various false reports in them, through the use of Freedom of Information Act, it is not enough to simply see they are false and DA them. This of course is a necessary action but is NOT the basic action.

One needs to construct a data bank of all documents and cross-index to get all documents in their possession - using one file to find things that will detect the existence of unrevealed additional documents.

This is not the final use of the data bank.

As in any insane being, one is looking for the basic intention that prompts the false reports factory to operate.

Somewhere at the bottom of the mess there will be found a being and an intention.

As one is dealing with the insane it probably won't be logical. It will be what it is.

Confrontation of a government agency and DAing cools them down and causes them to back down. This is an insane attribute - to fear disclosure and greatly value their rickety PR. So nothing in this should inhibit doing that.

But the end of this trail will be a blockbuster of a hidden order or intention.

It will have come from an insane individual with insane plans, with an insane idea that we could end it.

This is not it but a crude example: "they make people think, so my plans to get the whole country crushed might be detected." But that would be too sane.

More like: "they are really able to handle drugs so we would have to fire all our veterinaries."

Someone insane has been on this line.

It will be among the earliest dates and the craziest documents.

This is what the data bank, made up of documents obtained through the Freedom of Information Act, will eventually turn up if we carry right on through. And, documented and publicized, will blow the whole thing.

You have seen how far-fetched the lies are and how ineffective the effort really is.

Well, don't overlook that the false reports are willfully false and prompted by some basic intent we have not yet unmasked - but which we will.

STRATEGIC INFO

(Originally written by LRH on 6 March 1974. During this time period the strategy being operated on was to investigate and handle the spreading of false reports, harrassment and attempted genocide by government and police organizations against Scientology. These investigations led to the Rockefellers and disclosed their connections with intelligence, media, mental health, drug firms and banks, as well as their increasing activities to bring about a psych controlled police state type of society. Issued as an OSA NW Order on 5 April 1988.)

The following quote from The Shadow War, European Resistance 1939 - 1945 (written by Henry Michel, published by Harper & Row) is of value in handling the existing scene. Psychiatrists urged these measures on Hitler and carried them out.

David Rockefeller is priding himself on having reduced U.S. population to a decline and arrested the human population explosion by sterilization, abortion and other measures.

The Rockefellers financed the German beginnings of psychiatry.

Special attention is drawn to the last sentence in the quote as it confirms current strategic planning.

"It is almost inconceivable that human beings should be capable of the cold decision to exterminate, by a sort of metaphysical death sentence, millions of their fellow men without distinction of age or sex. In Poland, Lithuania and Russia the nazis collected the Jews into a number of ghettos, into which they also crowded Jews no longer living there and Jews brought in from other areas. Each ghetto formed a closed Jewish world, an isolated entity from both the human and the economic points of view. This might have been the initiation of a plan of total segregation, but in fact it was only one phase in a monstrous scheme.

"In two speeches early in 1942 Hitler announced that the Jews would be annihilated. Technical 'trials' in the USSR had proved the 'inadequacy' of existing methods - mass shootings, cremation of the bodies in furnaces and mobile gas chambers. But the German chemists now had a 'quick and clean' solution: they had produced a deadly gas named Zyklon B which, after encouraging trials, the 'specialists' considered full of promise.

"The method adopted was to construct gas chambers camouflaged as shower baths in certain camps in Poland - the main one was at Birkenau; to these were attached

giant crematoria in which the bodies were burnt. The number of Jews rounded up all over Europe and carted to the 'death camps' is estimated at six million. At least as many others fell victim to the maltreatment meted out to them in the ghettos, the diseases which raged there and German action in suppressing revolts such as that in Warsaw.

"The death of the Jews was in no way necessary to ensure the victory of nazi Germany; this hideous crime was entirely gratuitous. Its gigantic proportions were only realised after the war, though the Polish Resistance had managed to contact certain deportees and pass information to its government in London. The warnings and threats issuing from the BBC made no difference to the murderers' determination. With hindsight, however, it is clear that in the eyes of European Resistance this massacre more than anything else legitimised, indeed sanctified, their action."

INTELLIGENCE ESTIMATIONS AND PREDICTIONS

(Originally written by LRH on 22 August 1973.
Issued as an OSA NW Order on 7 April 1988.)

When an agent or operative turns in summaries or documents, these are poured into the main intelligence files and any "special bank" that is of current interest.

These main files or "special banks" can be made to operate like computers without the bother of electronic liabilities.

Modified only by errors of concentrated attention where none should be going or omissions of areas that should be under collection, these files or "special banks" will divulge new data.

Here is where we leave the subject of intelligence reports (See HCO PL 25 April 1968, INTELLIGENCE ACTIONS) and enter the field of ESTIMATION AND PREDICTION.

A main file is where everything is filed. A "special bank" is a separate file where data is ADDITIONALLY AND ALSO filed relating to an exact subject.

When filing and cross-indexing is kept up to date (and it always must be) it is now possible to begin the work of ESTIMATION.

This is done by examining the main files and locating the fattest folders related to any one group or subject. Let us say one is just now interested in dog catchers. The cross-file index, if properly prepared, will show that several dog catchers are in the main files. One simply pulls their files from the main file, leaving a dummy to catch new filings and to show where the main file is, and makes a "special bank". This is now the Dog Catcher Special Bank.

Now if you look at the above paragraph again you will see that SOMEONE had to say that "we are now interested in dog catchers." This in essence is an ESTIMATION in a crude form. One noticed by general observation that there simply seemed to be a lot about dog catchers lately getting into the main file. So the head of the section being alert decides that there might be something growling in that area. So he rapidly makes up a "special bank" of all files that seem to be concerned to some degree with dog catching.

Noticing that we should be looking at these dog catchers is what could be called "flair". It's a "Hey, looking this over we seem to have a lot of dog catchers lately, so I better get some data on them and make an estimation."

No file or computer can actually THINK. It can however be so arranged that QUANTITY begins to show up around certain

names and that a casual examination of those names shows they seem to have dog catching in common.

So an Estimator, working the files routinely, having noticed this, would make a "special bank".

The "special bank" is not very elaborate. It can be as crude as simply spreading out the folders on a desk and looking them over FOR THINGS THEY HAVE IN COMMON OR NAMES IN COMMON TO THEM.

It can be as elaborate as making a new card index for every name in those files and what file they came out of; then filing these cards in alphabetical order. As one has taken EVERY name out of each file in turn and put each on a separate card, it is obvious that when one then puts them in alphabetical order, the names in common to two or more files will occur as two or more cards.

If agents are trained to collect all names and connections of names on every investigation and if these names are supplemented by adding in directories, and if filing has been kept up so that a file exists for every name, when you choose files for a special bank they will be the fattest on that subject. And when you work the special bank over again, you will get the precise common denominators of people that run through several files.

You can now say, "Get me more data on Mr. Plow, Mr. Row, Mr. Bow and Mrs. Snap" and when that data comes in (and is added to main files but especially to this "special bank") you will suddenly find yourself expanding ABOVE the level that your special bank was at before. In other words, you have found new horizons.

You will find if you do this that Mr. Plow and Mr. Row are just goofballs or dogmeat sellers, that Mr. Bow died last year and that Mrs. Snap is all you have left.

So we look up Mrs. Snap even further, "Hey, go look over Mrs. Snap again" and we suddenly find she was receiving money for a fund called "Kennel Support" but was actually the head of a dog catcher ring.

We can now PREDICT.

If we are out to handle the dog catchers we will have to work on Mrs. Snap to get her to reform.

We can write up a program like this:

PREDICTION: DOGS WILL CONTINUE TO DISAPPEAR.

"The situation is that dogs are getting caught." "The WHO is Mrs. Snap." "The following program based on best advices should be carried out:

"1. Confront Mrs. Snap and get her attitude
etc."

One needn't elaborate for it is obvious that many ways exist to legally and ethically persuade Mrs. Snap to give up her career of crime.

The tools one is using consist of looking for people or groups that are themselves outpoints. This is about all the relationship this has to the Data Series.

The police use a crude version of filing which does not bear much resemblance to this. They have a RECORD of someone and they just keep adding to it and adding to it, putting in false reports, opinions, anything. If someone is "after" that person for some reason or another, they pull out the file and use it. This is a "dossier system" in such vogue with the Czar's Cheka¹ and copied ever since and even put into computers.

There is no excuse for a "dossier system" as it has a suppressive action on everyone: the files one by one are used as a sort of punishment system. It exists to catch individuals without relation to general situations. Thus police continually find themselves up against increasing crime since they do not handle broad situations relating to crime. The reason this is apparent is that if they did use a different approach they would have found a long while ago that their violent crime was occurring amongst people recently in mental institutions or prisons and it would have led them to condemn the ineffectualness of the psychiatrist, psychologist and look for other means.

An exception is where an intelligence action is undertaken by police to combat organized crime or groups but here again they do not achieve reduction (as witnessed by statistics) as their system never leads them outside the group being investigated. They consume countless hours of "law enforcement" policeman and judge time which could be saved if they adopted a more streamlined system which, amongst other things, weeded out false reports or vexatious complaints with no foundation in fact.

The only point here is that filing systems DO exist other than the one being described and that the effectiveness of a filing system is rewarded by saving time and energy and the achievement of its actual purpose of situation predicting and handling.

One can vary this system of intelligence filing and making "special banks" in a number of ways. One can shortcut everything in it but the actual making of the main files and the actual pulling of "special banks" and studying them.

One can keep a main system of individuals flanked by a cross-index system of groups which shows how many individuals in the main bank fit into each specific group.

One can keep a main file of groups and flank it by "special banks" of individuals who are common to one another or to groups.

The whole point is that ALL data by name and separately by group must get into the main files.

The action of estimation is helped by a system that shows some GROUP getting fat with names.

The action of prediction is always done by forming a "special bank" for study and sorting out.

The action of programming comes from any data in the individual or the group file.

The material is from newspaper accounts, literature issued, corporation filings, from almost innumerable types of sources.

Knowledge of the Data Series outpoints prevents one from buying false reports in the files and careful cross-filing eliminates the innocent bystander; these two things can defeat any intelligence system: accepting false data and hitting innocent bystanders; this is the fault of nearly every system in existence.

Intelligence filing done well, estimated well, furnishes predictions which can be programmed and situations can be handled that would otherwise drop on one from an apparently clear sky.

THE MECHANISM OF ATTACK AND DEFENSE

(Excerpted from LRH Tape 6310C21 SH Special - 315, 21 Oct 1963, ATTACK AND GPMs. Issued as an OSA NW Order on 30 May 1988.)

I have to wear the Washington legal hat and go up there and solve their various difficulties for them.¹

It's a spectacle of people defending, defending. You know you can defend yourself into more holes and it has never occurred to them, on this one suit that has been going for about 5 years, to attack anybody. That would be very dangerous! Don't attack anybody!

Look at the situation. Every time the enemy offers an attack, you defend against it and that is all you do. Any castle, to hold out, has got to sortie. The proper strategy for any battle is to find a weak point in the enemy lines and attack it.

The reason the United States is losing against communism is simply on these same mathematics. That they are losing is patent. All they are doing is defending the points attacked.

On this Berlin thing², before it really came to a hot boil, the United States was not claiming any piece over there and so is never going to be able to swap Berlin for anything. The proper action is to go find something to collect as a piece. Yet there they stand, defending, defending, defending, defending. Well, don't they want to win?

How about an auditor that sits there and defends and defends and defends and defends against the attack of the pc? He never looks for the bypassed charge and he never does anything effective to straighten out the case. He just sits there and defends himself. He would last about 2 minutes. This is about the most dangerous thing you can do. Look it over. It is certainly the most unethical thing you can do.

You can defend to a certain degree and you have to defend to a certain degree. But use 75% of your energies to attack and you will always win. Find a weak spot and attack it. Attack expertly and attack perfectly and don't flub with the attack. Always put your concentration on the attack and you win every time.

People look awfully silly two miles in your rear without any supplies, without any ammunition, with no defenses and no place to go. They attacked all right. The whole front of the battle shifted. They attacked and you didn't defend. You went and destroyed their supply dump. It is very embarrassing to have this sort of thing happen.

The whole of life is an interchange, if you're going to live. It is an interchange activity. It is putting out anchor points.

Let's look at the gradient scale of how you would go about this.

Supposing you are just there all by yourself and there is no limitation to your putting out anchor points. You can put out as many anchor points as you like.

Somebody else shows up and says, "You shouldn't put out these anchor points," or, "I want to have some of this space too," and they put out anchor points against your anchor points. So you don't put out anchor points quite so far. I am talking about the Factors now.

Let's suppose that every time you put out an anchor point, somebody else forbade you to put out the anchor point and you complied and agreed and didn't put out your anchor point. How big do you think you would be after a while? That is about how big you are now. That is practically the way you got there.

There is nothing quite as disturbing and there is nothing quite so certain to throw anybody into apathy as just continuing to put out your anchor points. This is the most disturbing activity that you can engage in. Everybody says, "You mustn't put out your anchor points," and you put out your anchor points. Then they give you lots of reasons why you shouldn't put out your anchor points and you put out anchor points. They bring all sorts of duress to bear on you on why you shouldn't put out your anchor points and you put out your anchor points. What is going to happen to their morale?

Sometimes it is very difficult to continue to put out anchor points in this particular way. Sometimes you just get cut to ribbons and it is those particular times that you got cut to ribbons you tend to remember as lessons not to attack or lessons not to put out anchor points.

The gradient scale on the thing goes: Putting out anchor points, in other words, continuing to create your space; to attacking that which is preventing you from putting out your space. That is also putting out anchor points. And you get down along low human levels and what are you then involved with? You are involved with attacking those who are preventing you from putting out anchor points.

You go down scale just a little bit further and you start defending yourself against attacks. This causes you "to live good," "to have good behavior," to have various socially acceptable characteristics, all sorts of things. These things are basically defenses against attacks, direct attacks.

You can go downscale even further than that. You have the defenses against possible attacks and this causes people to live in castles, dig moats that nobody will ever think of charging against, invent weapons that have no particular use and invent social characteristics that are impossible to attack. This causes you, in other words, to go downscale a bit further.

There is a point further downscale than that, which is imagining that you are under attack. You are defending yourself against possible attacks. You are not being attacked - you are simply preparing yourself to defend possible attacks.

Just below that, there is a point where, because there are all these defenses, there therefore must be attacks. It proves itself. You have got a moat dug all the way around the place. Obviously there must be somebody going to ride across that moat.

Some of the screens that a thetan puts up are terribly entrancing. These screens are very, very entrancing because they leave them up forever. Why did they put them up in the first place? Well, they put them up against a lion. The lion might still be there. You would have to take the screen down to find out. You don't dare take the screen down because you would be attacked if the lion were still there.

This causes a very funny action. You can get a thetan, a pc, and get him to find one of these black screens and get him to pick up one little corner of it and peek around it real fast. Sometimes he will really have to get his nerve up to do it -- and he will. He will see something like a mocked up lion or a snake or something on the other side of the black screen. One of his answers of confronting is to cover it up so he won't have to confront it -- black it out. There is the final mechanism of a defense.

Permanent defenses lead to a belief that one is under attack. When you get way down scale it must be that you are under attack because there are the defenses. Somebody must be ready to launch the rockets at you any moment, because here are all these radars waiting to detect them and of course, the more one defends, the less one becomes mobile. So therefore, actually, he never gets out to look if there are any attackers. And I imagine that there are nations on planets, someplace in this galaxy at this very moment, who have no neighbors, but who believe implicitly that those neighbors are there with full armies, ready to attack them and that live a life of complete defense, complete immobility, never going abroad, carrying through all of the various survival activities to prevent an attack against nations that are no longer there and that are long since gone to dust.

One has a defense up against an area of confusion. He has a stable datum all arranged to take care of an area of confusion that has long since ceased to exist. A thetan eventually traps himself.

What do you think are the chances of your opponents of trillions one hundred - trillions written one hundred times - still being alive and kicking and ready to knock your block off? And yet, you have all the defenses for that period all rigged and all the stable data already there with those defenses against those confusions and attackers of trillions one hundred.

And that, in actual fact, is what a thetan is doing.

The above are mechanisms of defense of a certain kind of order. They are also, of course, mechanisms of attack.

You will have to defend to a certain degree. But if you use 75% of your energies to attack, you will always win.

¹ In wearing the Washington legal hat, LRH referred to having to handle the raids of the Food and Drug Administration on the Founding Church in Washington, D.C. In 1956 and 1958 the FDA seized Dianazene tablets and in January 1963 books and E-Meters. The FDA sued the D.C. Church. This suit was initially lost by the Church. However the Church appealed and won the appeal against the FDA. The FDA petitioned for rehearing the case and this petition was thrown out by the U.S. Court of Appeals. On 3 August 1971 LRH announced in the Orders of the Day: "We won our FDA (Food and Drug Administration attack on the E-Meter) case in a Washington Court. This gives the Church of Scientology exclusive rights to the E-Meter, wipes out all squirrels, confirms Scientology as a religion and restores our property - books and meters seized in '63." ² "This Berlin thing" refers to Berlin, the largest city in Germany which became the hottest issue in the Cold War between communism and democracy. The city of Berlin is located 110 miles inside communist controlled East Germany. Before World War II, Berlin was the capital of all Germany and with 4 million people was the largest industrial city in Europe. At the end of World War II in 1945, Berlin lay in ruins. Allied bombs had wiped out about a third of the city. More than a million people had been killed. Berlin surrendered to the Russian army on May 2, 1945. Although Berlin lay deep within the Soviet zone of Germany, the Russians guaranteed the Western powers free access to the city. The Allies divided Berlin into four sectors and set up a four-power council to govern Berlin. Each ally occupied one sector. The three sectors occupied by American, French and British troops became known as West Berlin. The Russian sector is East Berlin. West Berlin soon became a gateway to freedom for hundreds of thousands of East Germans who wanted to escape communism. From 1945 to 1961, almost 3,000,000 people escaped to West Berlin. Then, on August 13, 1961, the communists sealed off the border between East and West Berlin with a 26-mile concrete and barbed wire wall across the city. They also boarded up windows and doors in buildings facing West Berlin. A few desperate refugees still managed to escape. But for most East Germans, the door to freedom had been shut tight. The Berlin issue came up over and over again in the Cold War of the 1950s and 1960s. Russian Premier Nikita S. Khrushchev demanded that Western powers withdraw from West Berlin and turn their sectors into a "free, demilitarized" city. The Western nations however insisted on staying to safeguard West Berlin from becoming defenseless against communist aggression. Ref. World Book Encyclopedia.

OUT-ETHICS SYMPTOMS
WILFUL FALSE REPORTS)

It's been my experience with government employees that they don't know their own codes and laws and will pretend to quote non-existent statutes.

They might simply tell you that there is something wrong with what you're doing when there actually isn't.

One is prone to underestimate the criminality of certain government agencies. I know of many instances of the above. It's one of the ways they operate.

So, any government allegations should be looked over very carefully as they are very suspect.

HOW TO HANDLE BLACK PROPAGANDA

**RUMORS AND WHISPERING
CAMPAIGNS**

"Black propaganda" (black = bad or derogatory, propaganda = pushing out statements or ideas) is the term used to destroy reputation or public belief in persons, companies or nations.

It is a common tool of agencies who are seeking to destroy real or fancied enemies or seek dominance in some field.

The technique seeks to bring a reputation so low that the person, company or nation is denied any rights whatever by "general agreement." It is then possible to destroy the person, company or nation with a minor attack if the black propaganda itself has not already accomplished this.

Vicious and lying gossip by old women was the earlier form of this tactic and was so bad that some areas put them in public stocks (neck yokes) or drove them out of town.

In modern times there is no such check on black propaganda. Difficulties and costs of libel and slander suits, abuse of press privilege, lay anyone open to such a campaign.

All one needs is an enemy. And there are few men in history who have been without enemies.

There are random individuals in the society who do not understand very much. This is expressed as a sort of malicious glee about things. Such pass on slanderous rumors very easily. In an illiterate society such people abound. Since they cannot read, the bulk of knowledge is denied to them. Since they do not know very many words, much of what is said to them is not understood.

This is not isolated to the illiterate only.

What they do not understand they substitute for with imaginary things.

Thus such persons not only listen to slander but also corrupt and twist even it.

Thus a rumor can go through a society that has no basis in truth.

When numbers of such rumors exist and are persistent, one suspects a "whispering campaign." This is not because people whisper these things but because like an evil wind it *seems* to have no source.

Black propaganda makes use of such a willingness to pass on and amplify falsehoods.

Much black propaganda is of course more bold and appears blatantly in irresponsible (or covertly controlled) newspapers and radio and television.

But even after a bad press story has appeared or a bad radio or TV broadcast has been given, the "whispering campaign" is counted upon by black propagandists to carry the slander through the society.

Thus any person, any being, is at risk.

No person, company or nation has totally clean hands. That is left to the saints. In childhood one stole a few apples, broke a window or two, dented a fender, went joy-riding in a "borrowed" vehicle or took pennies or candy bars that weren't his own.

Childhood is quite lawless and the teenage period is often a revolt against the closer and closer fitting straightjacket of "proper social conduct." One marries the wrong spouse or goes astray with another in some incautious moment, or commits various large and small sins of which society disapproves.

Any of these things tend to make one vulnerable to attack, upon his past or repute.

A person comes to fear bad things being said about him. In the face of a whispering campaign, real or imagined, one tends to withdraw, tends to become less active and reach less.

This is equally true of companies and even nations.

Thus, unless one knows how to handle such an attack, one can in fact be made quite miserable and ill.

THE ATTACKER

The world is full of madmen.

The basic characteristic of extreme madness is perpetual attack, attacks on anything, attacks on persons or things which contain no menace.

Extreme, not petty, crime is at the root of such an impulse.

The attacker has an evil purpose in life. He is a thing of death, not life. And his harvest is a death harvest.

Such a person feels he cannot be safe unless everything else is dead.

His evil purpose takes many forms and expressions. The end product is the same—death.

Where an attacker has gone too far he is himself then attacked. Long, bitter quarrels and national wars are alike the to and fro exchange of violence.

Where an attacker lacks the physical means of destroying others and where his own purpose would fail if disclosed, the attacks become covert.

He uses word of mouth, press media, any communication channel to spit his venom. He hides himself as the source; he makes the verbal attack seem logical or real or proven.

He counts on the utterances being picked up or distorted and passed on by the more base people in the society.

This is black propaganda. It is intended to reduce a real or imagined enemy, hurt his income and deny him friends and support.

Companies or associations do this to competitors. The American Medical Association maintains its multibillion dollar monopoly over sickness by continuing a long, well-financed black propaganda campaign against anyone it *thinks* might threaten their income. The head of their "Department of Investigation" (as they call their black propaganda department) once said they just kept it up and kept it up against any rival

and one day WHAM! They use press releases, their own members, paid ads, displays, government connections and speakers, any channel, to release endless streams of *imaginary* tales against any *imaginary* rival. While this does bring them government support it has brought them deep hatred not only from rivals but the public at large.

They get back what they put out. They were once wealthy. They are no longer. Their members dislike them and increasingly doctors belong only to state medical societies, not the AMA. The individual doctor most often has good public relations. His main society benefits from this and betrays it. One day, no AMA. WHAM!

So black propaganda is not something one lightly instigates. For it recoils on the person who uses it.

Let us see how it recoils.

Too much venom put out stains one with venom.

Too much black propaganda gets attacks in return.

Black propaganda is essentially a fabric of lies. The AMA simply imagines stories to put out or have put out.

Sooner or later such stories are found not to be true. ONE false story can destroy the credit of the teller. Now who listens?

Thus a black propaganda campaign is vulnerable. The attacker sooner or later is attacked—often by many.

But those who have to counter such a campaign need the technology of how it is handled.

ANY NEWS

There is a natural law at work that unfortunately favors black propaganda.

WHERE THERE IS NO DATA AVAILABLE PEOPLE WILL INVENT IT.

This is the Law of the Omitted Data.

A vacuum tends to fill itself. Old philosophers said that "nature abhors a vacuum." Actually the surrounding pressure flows into an area of no pressure.

It is this way with a person, company or nation.

Hit by lies the person tends to withdraw. This already tends to pull things in.

The person does not then wish to put out data. He becomes to some degree a mystery.

To fill that mystery people will invent data.

This is true of persons, companies or nations.

This is where *public relations* is a necessity.

Essentially public relations is the art of making good works well known.

It is a fatal error to think good works speak for themselves. They do not. They must be publicized.

Essentially this is what public relations is. And this is *why* it is—to fill that vacuum of omitted data.

In the midst of a black propaganda campaign one is denied normal communication channels. The press media along which the campaign is being conducted will *not*

run favorable comment. One is mad if he thinks it will as it is serving other masters that mean to destroy the repute of the target.

"Authoritative" utterances push plain truth out of sight.

Thus public relations people have to be very expert in their technology when they confront black propaganda.

THE TECH

When one is not fighting a battle against black propaganda, public relations is easy.

One hires a reporter who gets to work thinking up ideas and turning out releases. That's why reporters are often thought of as public relations people which they are not.

In the face of a black propaganda campaign, such releases are twisted, refused and that is the end of it.

There is far more to the art than this.

These are some of the rules that apply:

1. Fill the vacuum of omitted data with factual data.
2. Prove all false utterances heard are lies.
3. Discredit every rumor encountered.
4. Handle the interest level with any utterance.
5. Carefully study out the scene until the exact source is located.
6. Use the knowledge of source to impede or destroy the source of black propaganda by noncriminal means.
7. Continue to fill the vacuum of no data with good data using any channels available.

Each one of these points could well take a book. But understanding them and using one's initiative, one can fill in a lot of the tech himself.

The variations of each one are endless.

APPLICATION

1. Fill the vacuum.

First of all, cease to withdraw. It is proven conclusively that in public relations handling of black propaganda, only outflow pays off. Saying nothing may be noble in a character but it is fatal in public relations. Yet even "experts" advise it (when they are doing their clients in).

Blunt denial is crude and can be used against one as a sort of confirmation.

You don't have to announce or spread a flap and never should. PR men often *make* the flap.

But don't interpret this as "silence is necessary." Get in a safe place and speak up.

Use any channel to speak up. But don't seek channels that will corrupt what you say in repeating it.

Don't stay on the same subject that you are being attacked on.

An example of speaking up without denying and thus confirming might be

STATEMENT: "I read your company went broke last month."

REBUTTAL: "My God. You're telling me! If we hadn't got out of that contract we really would have gone broke. There was a hell of a row in the board room. But McLinty won. Scotch to the core. He said, 'I won't sign it!' Like to have tore the president's head off. Hell of a row. Seems like we got 80 million buried somewhere and McLinty is in charge of it and he won't *move an inch* on it."

The interrogator's conclusion is you're not broke. He's got data. The vacuum is filled with a story of board rows and 80 million mysterious reserves.

2. Disprove false data.

The technique of proving utterances false is called "DEAD AGENTING." It's in the first book of Chinese espionage. When the enemy agent gives false data, those who believed him but now find it false kill him—or at least cease to believe him.

So the PR slang for it is "dead agenting."

This consists of disproving utterly the false statement with documents or demonstration or display.

One has to have a kit (a collection of documents) or the ability to demonstrate or something to display.

STATEMENT: "I've been told you are in trouble with income tax people."

REBUTTAL: "Here's a document of fully paid taxes and a letter of commendation from the tax authorities." Displays same.

Result? Whoever told him that is now dead with him as an accurate informer.

The *best* way to dead agent is when the person makes some disprovable statement, find WHO to fix his mind on it and then produce the rebuttal.

STATEMENT: "I hear you aren't married to the man you're living with."

REBUTTAL: "*WHO* told you that?"

STATER: "I forget."

REBUTTER: "Well you remember and I'll show you some proof."

STATER: "Well, it was a man. . . ."

REBUTTER: "WHO?"

STATER: "Joe Schmo."

REBUTTER: "Okay. Here's my marriage certificate. Who's the Joe Schmo nut anyway?"

Now it's Joe Schmo who's the mystery. How come he lies? What's in it for him?

When one hasn't got the document but can get it, one can say, "You tell me the name of whoever said that and next time I see you I'll show you something *very* interesting about it."

And be sure to get the document and see him again.

Dead agenting has a billion variations. "It won't fly." Fly it. "Place is empty." Show him it's full.

The subject matter of dead agenting is PROOF in whatever form.

You only challenge statements you *can* prove are false and in any conversation let the rest slide.

EVERY FRIEND, EVERY OPINION LEADER, EVERY STAFF MEMBER YOU HAVE, SHOULD BE SUPPLIED WITH A DEAD AGENT PACK CONTAINING PROOFS AGAINST COMMON RUMORS (AND BROCHURES AND COACHING TO FILL THE VACUUM).

3. Disprove every rumor.

Proving negatives is almost impossible. "How do I know you aren't a CIA man?" Well, how can one prove that? One can't whip out a KGB badge as that would be just as bad. No one ever wrote a document, "Bill Till is not a member of the CIA." Useless. It is a denial. Who'd believe it?

Sometimes "You don't" works.

But the right answer to a negative (no proof) is a "fill the vacuum."

STATEMENT: "How do I know you're not a CIA man?"

REBUTTAL: "Christ, please don't insult me! The CIA tried to hire me once. Said they'd shoot me if I didn't join up. Cuba it was. I was a sugar salesman. And Batista was trying to . . . , etc., etc. See this scar on my leg? (Pulls up pants.) Batista cop shot me because he thought I was CIA. So don't bring up painful subjects. (Rubs scar.) (Laugh.)"

But once in a while you *can* prove a negative. Accused of drug smuggling one can show he's a member of the antidrug league. The counter in a negative proof must be *creditable*.

A million million variations exist in dead agenting.

The basis of it is NOT to be the thing rumored and to be able to prove it fast.

4. Handle the level.

Handling interest level is basically an exercise in the Tone Scale. (See Tone Scale Charts of Human Emotion.)

Agreement occurs at the same emotional tone level as the person making the statement. He buys his facts at that level.

To go half a tone up from his level is to command him within his zone of reality.

STATEMENT: "It's hopeless trying to believe in anyone. I thought you people were all right but now I hear you are all hippies. (In a dull apathy.)"

REBUTTAL: "Oh, oh, oh, who could have told you such a sad lie. (Sob.)"

STATER: "Wouldn't be any use to say."

REBUTTER: "(Sob.) But you've got to say. Oh, I feel so awful."

STATER: "Well, he wouldn't care if I told. It's the local minister."

REBUTTER: "(Sob.) (Kleenex.) What an awful thing to say. Just because we found him dead drunk and took him home to sleep it off, and he said if we ever told, he'd say we're hippies."

STATER: "What a sad story. Oh, it's a bad world. How ungrateful."

You go half a tone up. Give him a story, on the subject or not. Like "(Sob) That's because we lost our instruments. We once were a band and this nightclub owner wouldn't pay us and we had to sleep in the barn (sob). . . ."

Another one.

STATEMENT: "I hear some bad things about you people. (Covert hostility.)"

REBUTTAL: "(Anger) Who would DARE say such things?"

Etc.

And story type can be matched in tone.

STATEMENT: "I hear those people stole some rowboats."

REBUTTAL: "Who said so?"

STATER: "The dock master's son."

REBUTTAL: "Oh, him. Gets things wrong. *Our* rowboat was stolen! With all the gear in it. We were out fishing and . . . say, you don't suppose HE stole it do you? Did you ever hear of him stealing anything? Has he got a record?"

Well, this dock master's son will now "have a record" in the stater's tales. As *theft* is of interest to him, crime will also be.

5. Carefully study out the scene.

The technology of finding who is shooting is very vast. But the core of it is FILING.

All PR is expensive in time or money or both. And nowhere is it more time-consuming than in locating the source of a black propaganda campaign.

But, to live at all, one has to engage in this search at some time or other.

One just keeps running down these tales until one locates the source.

There can be more than one *apparent* source and these can be handled. But they will at last lead to the real instigator.

One just keeps locating names and filing them, with dates.

At length one name file is very thick. That's your boy—or association or company or nation.

6. Impede or destroy.

As you have been dead agenting as you looked, the attacks get handled. The campaign ebbs and flows but actually lessens.

There are thousands of variations on finding the real WHO.

But essentially it is just looking, dead agenting, filing, looking on and on.

You are, in this whole period, *handling*.

Once in a while it happens fast.

Now and then the black propagandist packs up and fades away before he is fully spotted. He becomes aware of the counteraction.

The usual action is a counterpropaganda campaign *based on truth*.

It is a long-to-find and hard-learned fact that people who engage in black propaganda have big bursting crimes to hide.

They do not have *little* crimes. They have BIG ones.

One's own ability to confront evil may be too low to really grasp the black propagandist's crimes or believe they exist.

Such people are often SANCTIMONIOUS hypocrites. They are usually arrogant and will not parley (have conferences with a foe). They appear so terribly sure they are RIGHT that it fairly shakes one's confidence that they could ever do anything wrong.

Thus the black propagandist is not detectable as such in many cases. The lordly institution, the lofty society, the glittering country are far, far above such a nasty psychotic trick as a studied, financed, expertly run campaign of vicious lies.

Thus they are believed. Or their servants are believed. And their campaigns can be very effective.

But this makes them hard to suspect or detect. And it makes it hard to get anything bad about *them* believed.

But under all this are *real* crimes. Not stealing apples or pinching pennies as a child. *Real* crimes like extortion, blackmail, embezzlement and mass murder are sitting in their closets. Believe that. For in the course of your counterattack you may despair of ever finding anything.

But you will find it.

A lofty railroad—but secretly murdering anyone who opposed their land grabs. A minister of high renown—but a secret member of and taking orders from a murder mob. The biggest and "most respected" union leader in the country—but a numbered agent of a foreign intelligence service dedicated to destroying the country's fuel capacity and defeating its president!

And each of these engaged in and never was suspected of black propaganda campaigns that ruined many lives.

Bad guys tend to get rid of good guys. Sometimes for what they consider good reasons, sometimes for imagined reasons, sometimes because the bad guy just can't *stand* a decent, bright person.

But there is no real truth in the bad guys always cause their own downfall. It may come, but it may be far too late to save the reputation or even life of the person being attacked by hidden campaigns.

Therefore it is *vital* to handle the matter. One can't just hope it will all go away. It won't. It will get disastrous to the degree that it is not handled.

The less handling, the more disastrous.

There is another hard-won truth,

ONLY COUNTERATTACK HANDLES.

The fact is that just going on PRing oneself does not remove the effects of the campaign, and all too soon one no longer has communication lines left in order to handle anything since reputation is so destroyed no one will listen and no lines remain.

One has to fill the vacuum of the counterpropagandist's evil deeds. As these are never exposed to view, there is a vacuum there.

Another strange thing is that press *will* print attacks. Maybe this will no longer be true in some enlightened age. But in this era, good attacks or fights between things will get print-space.

But press is *very* far from the only channel of communication. Governments do believe the press and think it is public opinion. A newspaper can be a fortress of some black propagandist. But a people often believes little it reads.

There are opinion leaders, there are letters, there is word of mouth. These are also channels of communication and really far more powerful than the press.

There is also friendly press. But a friendly-talking reporter is often the most suspect. He was so nice in the interview, so vicious in his article.

Statements one makes can be curved. "She had a birthday party" becomes "The delinquents in her circle gathered yesterday for a sex orgy and pretended to the police it was a birthday party. No one was jailed."

The brand of black propaganda is very easy to see in writing twists.

So it takes time and work to reverse an attack because normal channels have to be reopened and reversed.

It is done by attacks.

But attacks which are not true earn suits. So one must attack only on proven ground.

This requires a lot of hard search.

However, a black propagandist often has *many* other enemies. These have sometimes gathered data.

The principles are that when the subterminals are located, they are investigated and counterattacked. Then further investigation reveals closer terminals to the propagandist and these are attacked. In short, one investigates and attacks.

Always be ready to parley—that is, have a conference and settle it. The arrogance of the black propagandist often forbids this. And when it does, it means longer and harder work and, if well done, his downfall.

In any event, the attack is a long cycle, a complex cycle and often an expensive cycle. It consists of investigate and attack.

But remember, one *must* attack once he has any idea of the identity of the black propagandist or even his subterminals.

There is no other way out.

Any other course is death.

7. Continue to fill the vacuum.

Continuous good works and effective release of material about one's good works is vital especially in a black propaganda war.

One cannot just fight.

You are in effect advertising the other fellow when you expose him repeatedly. This gives you a new sort of vacuum. One becomes known as the fellow or company or nation that attacks _____. But who really is this fellow or company or nation?

Pamphlets, brochures, press releases, one's own newspaper and magazine, one's own contacts with opinion leaders, these and many more, must be supplied with A COMPREHENSIBLE IDENTITY OF SELF.

Distributing or using these, one publicizes one's own good works.

And one must also *do* good works. One can't just dedicate his life to eradicating the enemy, even when that is tempting.

On the other hand, within the dictates of safety, one cannot hide continuously. One must, through his good works and actions at least, be visible.

So a continual, truthful and artful torrent of public relations pieces must occur.

Then one day there is no enemy.

And one's repute is high.

There may be other attacks but now one can handle them as small fires and not as a whole burning forest.

WHAT IS BLACK PROPAGANDA?

You can see that black propaganda is a covert attack on the reputation of a person, company or nation, using slander and lies in order to weaken or destroy.

Defense presupposes that the target is not that bad.

One does not have to be perfect to withstand such an attack, but it helps.

But even if one *were* perfect it would be no defense. Almost all the saints in history have been subjected to such attacks. And most of them died of it.

The answer is PR TECHNOLOGY SKILLFULLY APPLIED.

To be skillful in anything, one has to know it and be experienced in it and DO it.

As weary a task as it may seem to some, as heartbreaking as it can be, one still has to *fight*. And fight with tools and technology and dedication superior to that of the enemy.

But progressing and getting small gains, small penetrations, small little skirmishes and battles, one at length comes up to victory after victory and at last wins the whole war.

One is saved.

PR Series 7

BLACK PR

About the most involved employment of PR is its covert use in destroying the repute of individuals and groups.

More correctly this is technically called BLACK PROPAGANDA.

Basically it is an intelligence technique.

It can be a serious error to cross Intelligence and PR.

These are two different fields. They have two distinctly different technologies.

A PR man must also know something of intelligence technology. Otherwise one day he will be left gaping.

Intelligence is intelligence. PR is PR.

When you gather information by intelligence procedures and at once employ it for PR, the result is likely to be poor.

It is not that it isn't done. It's that it isn't very effective. Also it is an act of desperation.

PR IS OVERT.

INTELLIGENCE IS COVERT.

PR is at its best when it begins and ends overtly.

Intelligence is best when it begins and ends covertly.

PR with an open demand by known authors, a demonstration, a conference is normal PR.

Intelligence trembles on the edge of PR when filched data explodes a storm in the public. It recoils when the authors are then known.

Black Propaganda is in its technical accuracy, a covert operation where unknown authors publicly effect a derogatory reaction and then remain unknown.

The effect of Black Propaganda is largely wiped out by "Oh, it was the Germans who set them up."

So PR enters intelligence in this way: One finds who set up the Black Propaganda and explodes that into public view.

This use of PR is almost that of an auditor to the group. One is disclosing hidden sources of aberration.

To use intelligence to find where they hid the body and then flip over into wide publicity is not very powerful in actual practice. There better be a body there and one better tell the police not the public.

If there are no effective police, then one has the problem of police action. Exploding it to the public ideally is an effort to make the public a vigilante committee. Modern publics seldom rise this high. Educated publics seldom explode to the explosion.

A PR man who thinks taking Blitz & Company's crimes to the public is really just dreaming hopefully—without foundation. It may or may not hurt Blitz. It might recoil. The ability of the public to stand around and look stupidly at a dripping handed murderer without doing a thing about it is a symptom of our civilization. They *ought* to act. They don't. You can form an opinion amongst them but governing bodies won't consult it.

Exposure is not an effective road to *action*. It can be to opinion. It is slow.

Then what is effective?

INTELLIGENCE

By definition Intelligence is covert. Under cover. If it is kept so all the way it is effective.

When Intelligence surfaces it becomes very ineffective.

Threat and mystery are a lot of the power of intelligence. Publicity blows it.

Take the Red Orchestra, World War II, Stalingrad Campaign. In Berlin Schultz-Boysen and other highly placed Russian agents got the whole German plan of the battle that was to Stalingrad. Brilliant and covert intelligence. They passed it to the Russians. Brilliant and covert comm. The boss at Centre in Moscow put the ring's names and addresses in a code radio message. The Germans of course broke the code. The Germans rounded them up and messily executed them on meat-hooks. The Germans had no other battle plans but contemplated not attacking Stalingrad that way. This put the whole coup at risk. Then the Germans did use the plans the Russians knew and that was the beginning of the end of WW II.

So TWO exposures threatened the success of this intelligence coup. One was the stupid radio message. The other was the realization the Russians had the battle plans.

Exposure is the basic threat of intelligence.

PR is the willful broadcast of information.

The two don't mix well.

BLACK PROPAGANDA

Possibly used since the morning pale of history, Black Propaganda was developed by the British and German services in World War I into a fine art.

The word "propaganda" means putting out slanted information to populations.

One propagandizes the enemy population or one's own or neutrals.

In popular interpretation it is a parade of lies or half truths or exaggerations.

PR and advertising technology and mass news media are employed as well as word of mouth and posters.

The trouble with it is that it can often be disproven, discrediting the utterers of it.

It may serve the moment but after a war it leaves a very bad taste.

If one is engaging on a campaign of this nature, its success depends on sticking to the truth and being able to document it.

The entire black propaganda campaign conducted for 21 years against Scientology began to fold up in its 16th year because never at any time did its instigators (a) have any factual adverse data or (b) tell the truth.

The Scientology movement continued if only by heroic means and much sacrifice.

But at last nobody of any note believed the propaganda.

The attackers pulled in on themselves a counter attack based on penetrating horrible documented truth.

It required intelligence-like tactics to discover who it was exactly.

The "dead agent caper" was used to disprove the lies. This consisted of counter-documenting any area where the lies were circulated. The lie "they were ____" is countered by a document showing "they were *not*." This causes the source of the lie and any other statements from that source to be discarded.

That real trouble and damage was caused Scientology is not to be discounted. The brilliance of the defense was fantastic. The depth and inroads the propagandists reached was alarming. **BUT THEY DIDN'T MAKE IT.**

Some Black Propaganda campaigns have won in other areas, not Scientology.

The British got the US into World War I with Black Propaganda, despite a president elected on a peace platform.

Many individuals have been destroyed by Black Propaganda. Wilhelm Reich was by the lies and violence of the FDA.

So Black Propaganda is not a certain result technology. It is costly. It makes fantastic trouble.

Essentially it is NOT a PR campaign. It is a cross between PR and Intelligence.

The technique is:

A hidden source injects lies and derogatory data into public view.

Since it is a hidden source, it requires an intelligence approach to successfully end it.

In the meanwhile the "dead agent caper" is the best tool to counter it.

Legal action can restrain such a campaign but is chancy unless one knows the source or at least has counter-documents. It is risky solely because "law" is unpredictable. However legal action has a definite role in restraining, not in ending such a campaign.

A good policy when faced with a Black Propaganda campaign is to defend as best you can (dead agent and legal restraints) while you find out (intelligence) WHO is doing it. Then, confrontation can occur. Finding and suing false whos can make things much more involved.

Black Propaganda counter-campaigns are inevitable. One engages upon them whether he would or no. These are engaged on while one narrows down the area to an exact WHO. For instance, one knows the whatsits are attacking one. Thus he can counter-attack the whatsits. But *what* are the whatsits exactly? and to whom are they connected? and exactly WHO, an individual always, is keeping it going? These last three have to be answered eventually. And that requires an intelligence type search.

THE CROSS

So there is where Intelligence and PR cross.

When PR goes into Black Propaganda (hidden source using lies and defamation to destroy) it has crossed intelligence with publicity. They don't mix well.

The action is risky to engage upon as it may run into an ex-intelligence officer or trained intelligence personnel. It may also run into a dead agent caper or legal restraint.

Anyone engaging in Black Propaganda is either using a wrong way to right a wrong or confessing he can't make it in open competition.

PROTEST PR

Outright Protest PR, based on facts is a legitimate method of attempting to right wrongs.

It has to be kept overt. It has to be true.

Protest PR can include demonstrations, hard news stories and any PR mechanism.

Minorities have learned that only Protest PR can get attention from politicians or lofty institutions or negligent or arrogant bosses.

Where Protest PR is felt to be a necessity, *neglect* has already occurred on the issues.

The riots of Panama some years ago were very violent, verging on open war. This followed the negligence of the US in negotiating new treaties, a matter arranged for long ago and arrogantly skipped for several years by the US.

The slaves were freed in 1864 but were either misused or neglected for the next century and finally became a key racial problem full of demonstrations and riots and social unrest. Imperfect redress of wrongs following these then continued the riots. This is probably the biggest PR mess of the last century and a half wobbling this way and that. It is still in the stage of Protest PR, possibly because it went so very, very long unhandled.

The only real recourse these people had was Protest PR. Recently, black Congressmen were refused audience by the President and had to stage a demonstration before it was granted. But Protest PR *did* obtain an audience.

The silliest idea of modern times is conscription. Drafted soldiers might possibly be excused as a levee en masse but not as the habit of government in peace and war just to overcome their lack of ability to make the country worth fighting for and the armed services a stable attractive career. This is all the more foolish since hardly anyone in history ever had any trouble recruiting an army that could pay for one. Even Gibbon remarks on it as an amazingly easy thing to do in any civilization. And that is true today.

So Conscription is continued. Facing every young man with an arbitrary military future was a bad thing. Napoleon invented it and he lost.

Protest PR was the answer used to contest it. Met by force and violence, it has not halted.

Somebody will have to give the country a nobler cause more decently prosecuted, will have to better the services and conditions and will have to admit men without demanding their right names or perfect physique and make them immune to recall for civil offenses. Probably that army would fight well. Conscript services are too expensive, too inefficient and too ready to revolt for any sane government to use them. But here this unhandled wrong has to resort to Protest PR.

So Protest PR has its place. It is a fine art. It is the subject of fantastic skill and tech.

It is not good. But it does work and it is used as a last resort when normal hearings and good sense fail.

When money and force lead and opinion leaders are unheeded, when special privilege enters management or government, Protest PR, the strike, the demonstration, is the tool employed.

If that doesn't work, or if it is crushed, subversive actions, general intelligence actions, Black Propaganda and other evils occur.

PR used soon enough can avert much of these consequences.

But there are always two in any fight and the other side may not want to live and so set themselves up.

Intelligent early PR is the best remedy. But it is not always possible.

INTELLIGENCE ACTIONS

An Intelligence Officer, gives summaries. Never estimates of the situation.

Intelligence should give facts and reports. DATA is what is needed. Example "All info concerning Joe Jones has been turned over to prosecution for action"... "Our investigation on Tom Smith has revealed that he is a communist and was arrested 5 times for various crimes...we are taking further action" etc., etc., etc." That and that alone is what is needed, not alarming reports such as how bad it all is in Willabaloo. This is an effort to give an estimate of situation and is enturbulative.

Suppression occurs when generalities are entered into reports. Evaluations are generalities.

Forwarding of false information is a very high crime. Failure to forward information is an equally high crime.

An Intelligence Officer collects data, files by name and area, writes summaries and forwards the data to the correct terminal. This person should never at any time consider themselves capable of giving an estimate of the situation. This is done by the head of the division.

The standard actions of intelligence are:

1. Predict the trouble before it occurs by filing, cross indexing, investigation of areas, statistics and other means.
2. Investigate for crimes, the individual's who are creating trouble.
3. Prosecute.

This is standard, 1 2 3 action and should not be deviated from. The maxim is..."when under attack...attack". The point is...even if you don't have enough data to win the case...still attack...LOUDLY. Reason is, it is only those people that have crimes that will attack us, and they will soon back off for fear of being found out when attacked back.

Filing is a very important action in Intelligence. You file by name and area. If you get a report that has 10 names on it... 10 copies are made and a copy placed in each file. Areas can be kept by country, state, town etc., depending how large an intelligence unit you are handling.

Intelligence requires a very critical eye. No evaluation, generalities or estimates. Just data, summaries and specifics.

HCO POLICY LETTER OF 30 OCTOBER 1962

CenOCon

SECURITY RISKS INFILTRATION

As the Organization rapidly expands so will it be a growing temptation for anti-survival elements to gain entry and infiltrate, and attempts to plant will be made.

To foil these, all staff members must be alert to attempts of this nature and it is their duty to inform the Technical Director, or above, of any doubts they may have and to see that the necessary action is taken.

The Technical Director, working in liaison with HCO, now becomes in charge of Security in an Organization and the results of which are to be notified to the Assoc/Org Secretary and HCO and, after confirmation, thence to me.

Forms 7A and 7B for Staff, and Form 5A for HPA/HCA Students, are herewith supplemented by the Rock Slam Security Check and this is to be carried out exactly in accordance with HCO Bulletin of September 12, AD12. To increase reality in some cases, it may be necessary to substitute "Consider committing bad things to. . ." rather than "Consider committing overt acts against. . ." In very rare cases it may be necessary to increase the number of buttons but this is to be the exception rather than the rule. In the vast majority of cases, just use the four questions only, as per this bulletin.

This Security Check must be done with full auditor presence, be done in Model Session and the beginning rudiments especially must be properly in.

Those partaking in Staff Clearing Programmes can be given this Check during one of their sessions by their usual auditor. In the event of any doubt, the Technical Director may also make arrangements for a further check to be done.

Those not partaking in any Staff Clearing Programme must be checked by a skilled and reliable auditor under the direct supervision of the Technical Director.

This Programme will simultaneously also handle picking up Missed Withholds of old-time Scientologists returning to the Orgs of whom we can expect a great number, the Security Check being given in proper Model Session and the Missed Withholds being pulled in the beginning rudiments.

When a Rock Slam is reported as a result of this Security Check, a further check should be done to the satisfaction of HCO to confirm the fact.

Action to be taken to handle a Rock Slammer:-

1. *If a Staff Member*, suspend from any executive post and any post which involves important action on the communication lines of Scientology. Such a person may however still be used, at the discretion of Assoc/Org Sec and HCO, in a subordinate position under reliable supervision. He is to remain in this position until his goal has been found, when the situation will again be reviewed.
2. *A student on the HPA/HCA Course*, (or any other Professional Course) who is found to be a Rock Slammer should be suspended from the Course and ordered to the HGC for Auditing.
3. *HGC Preclears* should be checked early on in their Intensives to ascertain whether this condition exists.
4. *In a Clearing Co-Audit*, Rock Slammers should be segregated so that they are auditing each other, as far as possible, so that they do not hold back other members of the Co-Audit who are not Rock Slammers.

Remember, that this Programme should not be regarded as just a passing phase. It is to be instituted immediately and kept in force in all Orgs throughout the world for our secure and speedy expansion.

Insidious methods are used to infiltrate, and especially at times when expansion is fast and it is thought that our security arrangements are lax or apparently being relaxed owing to pressure of work.

So, BE ALERT TO THIS AND DON'T MISS ANYONE OUT "BY MISTAKE".

CORRUPT ACTIVITIES

(Reference: HCO PL 22 July 82 IMPORTANT - KNOWLEDGE
 Corr. & Reiss. REPORTS
 26.8.82)

The corrupt activities of a few deprive the many of their pay and an activity its prosperity.

The result of out-ethics in any long run situation is contraction and poverty for all concerned, even the perpetrator.

A staff member who privately sells org prospect lists to a squirrel, the I/C who lets the org get ripped off for some personal favor are actionable, of course, under criminal law. But their suicidal action is not the point here: They are selling out their friends and fellow staff members, messing up an org for no real benefit to anyone -- not even the criminal rip-off artist.

The one who would do it, the org, the field all suffer for it one way or another.

Only in-ethics can deliver standard tech.

Only a staff that is alert to such actions and reports those they cannot stop directly by a very stern direct confrontation with the culprit in private, can be sure of their own pay and working conditions and can expand an org.

Why moonlight or be in poverty when in-ethics can bring prosperity to all?

TARGETS, DEFENSE

It is quite obvious that Scientology has to maintain a defense perimeter. In 19 years of continual attacks it is obvious that Dianetics then Scientology must have lain across some concerted plan by another older group to do something else.

To analyze what the others intended, it is only necessary to review what Dianetics and Scientology intended to do and assume the reverse.

Experience has shown that defense is only effective when one sorties or attacks.

When we did not give a lot of time and energy and funds to knocking out real enemies, we came close to losing the lot.

The errors we have made have been:

1. Defending only.
2. Defending on Scn ground.
3. Being reasonable and assigning mild motives to the enemy.
4. Failing to attack early and hard.
5. Undervaluing the broad social value of Scn.
6. Individuating from other similar organizations.
7. Not learning enemy tactics and using and bettering them.
8. Failing to heavily contest for public opinion and public media.
9. Failing to identify the enemy early and hit him hard.

A. Our best defense is that we are sincere, that we are effective and that we commit no crimes.

B. Our next best defense line was being sure the public knew we were a Church.

C. Our next best was being quick and able and using very fast comm lines.

We must not repeat the errors of 1 to 9.

And we must reinforce A, B and C.

TARGETS

The vital targets on which we must invest most of our time are:

- T1. Depopularizing the enemy to a point of total obliteration.
- T2. Taking over the control or allegiance of the heads or proprietors of all news media.
- T3. Taking over the control or allegiance of key political figures.
- T4. Taking over the control or allegiance of those who monitor international finance and shifting them to a less precarious finance standard.
- T5. Generally revitalizing the societies in which we are operating.
- T6. Winning overwhelming public support.
- T7. Use all other similar groups as allies.

These, of course, are very long-range targets. But it is what must be done to continue the longevity of our organizations.

Our only justification for doing these things is that Scientology is the only game where everyone wins.

The names and connections, at this time, of the bitterly opposing enemy are:

1. Psychiatry and psychology (not medicine).
2. The heads of news media who are also directors of psychiatric front groups.
3. A few key political figures in the fields of "mental health" and education.
4. A decline of monetary stability caused by the current planning of bankers who are also directors of psychiatric front organizations would make us unable to function.
5. The cold war is being fought on home ground and has an apparent target of degrading Western society to a point where we are finding it difficult to operate; a degraded society can be swallowed up easily by any enemy.
6. The public is somewhat sympathetic already but in a democracy trials are by public opinion. To win all the way, the bulk of public opinion must be at the level of love us - hate the enemy.
7. Many groups exist with similar aims. They need organizing and uniting.

At first glance the targets T1 to T7 are a pretty big handful. But we have to start somewhere. And we might as well start in the direction of the total target as per T1 - T7.

Nearly everything we are doing is already tending in that direction T1 - T7.

We have the advantage of new vital technology and a monopoly on it. New technologies are the things which made progress.

We do not have a utopian dream or a planned society. We are trying to survive. Our theory is that if individuals become more honest and less harassed they will be capable of building a better society.

The fact is we would have gone along happily minding our own business. But these fantastic and continuing attacks have pushed us more and more into developing a technology and direction of defense.

We now have a lot of experience. We have been hurt, we have been held back. It has cost us millions. Normal channels of the society have let us down. Therefore we are on our own. Obviously. To our actual and factual view, the West is prostrate and near helpless and the rest of the world is a big slave camp.

If we don't do anything about it we and everyone else are gone.

So we may as well have a go.

If we unite all groups into an interplay, and use all forces extant and channel them, we have a very big chance of winning.

Therefore, from an appreciation of all data to hand and experience, it seems that T1 to T7 must be embarked upon.

These give us a multitude of lesser targets. Anything we do in guardian actions to add up to T1 to T7 is beneficial. Things that don't are a relative waste of time.

If we, doing our jobs, doing no wrong, breaking no laws, are having trouble operating, what about the rest of the West? We're not the only ones in hot water. In fact we are probably in far better shape than many, many other groups and for sure in better shape than other individuals.

So we can and must take the lead.

And we ourselves must develop many leaders.

We may as well start now and push all we are doing in defensive actions into T1 to T7.

BATTLE TACTICS

(This is a defense paper on material developed after 18 years of ceaseless attack by a foreign enemy. Nothing in this paper advocates physical violence or invites the physical destruction of persons.)

In these days of "cold war" when actual warfare is impossible due to atomic weapons, the warfare is waged in the press and public in the form of ideas.

If you uniformly apply the tactics and strategy of battle to the rows we get into, press or legal or public confrontation, you will win.

The enemy uses "groups" and meetings of groups like one would use squads.

If we and they are considered as two hostile and opposing nations at war, then a huge array of tactics and strategy become visible.

One parallels in the field of thought what is used and done in the field of battle in other ages.

You don't have to know too much about the tactics and strategy of warfare to apply this but it helps.

The end product of war, according to Clausewitz, the authority on it, is (condensed) "to bring about a more amenable frame of mind on the part of the enemy."

But there are also wars of attrition. We are engaged in one where total destruction of us has been the enemy's aim for, at this writing, 19 years. This is barbarian warfare, thus the enemy must have had very positive fears and terrors about us. Since he fought for total attrition. In this case it is not safe to hope for any half-way win. We must ourselves fight on the basis of total attrition of the enemy. So never get reasonable about him. Just go all the way in and obliterate him.

It is bad warfare to fight battles on your own terrain, in your own subject area. It is not good to fight in the territory of allies. Fight battles wherever possible only on enemy terrain, in and about his subject and his people, not ours. You can gauge your relative success by this. When all your battles are fought on his terrain, you are winning.

A good general expends the maximum of enemy troops and the minimum of his own. He makes the war costly to the enemy, not to himself.

One cuts off enemy communications, funds, connections. He deprives the enemy of political advantages, connections and power. He takes over enemy territory. He raids and harasses. All on a thought plane - press, public opinion, governments, etc.

Seeing it as a battle, one can apply battle tactics to thought actions.

Intelligence identifies targets and finds out enemy plans and purposes, enemy connections, dispositions, etc. It is fatal to attack a wrong enemy. But it is good tactics to make the enemy attack wrong targets or persons himself.

Good intelligence pinpoints who when where what.

Good PRO plans an action and operations fights the battle.

Legal is a slow if often final battle arena. It eventually comes down to legal in the end. If intelligence and PRO have done well, then legal gets an easy win.

You can win a battle even without legal and by PRO alone. You intend to win it without legal wherever possible.

The prize is "public opinion" where press is concerned. The only safe public opinion to head for is they love us and are in a frenzy of hate against the enemy. This means standard wartime propaganda is what one is doing, complete with atrocity, war crimes trials, the lot. Know the mores of your public opinion, what they hate. That's the enemy. What they love. That's you.

You preserve the image or increase it of your own troops and degrade the image of the enemy to beast level.

Always be ready to parley but watch for tricks. Don't give the enemy breathing space.

Capture and use his comm lines. A press magnate on your side is a big win.

You have in one of these publicity wars all the factors of modern wars complete with artillery, cavalry, infantry.

For example at this writing, all fighting has been on our terrain; they knew our generals we didn't know theirs; they had all the press, funds, government control. We are reversing this. We are fighting now on their ground. But we have a long way to go.

We will make it all the way providing we look on this in terms of active battle and not as a "if we are saintly good we will win." The people who win wars have a saintly image but they win the war by clever and forceful use of the rules of tactics, strategy and battle.

Wars are composed of many battles.

Never treat a war like a skirmish. Treat all skirmishes like wars.

HCO PL 16.2.69 II

It will be seen that the section has all the useful functions of an intelligence and propaganda agency. It finds the data and sees that it gets action.

The determination of what a project is is simple - what agency or group is attacking Scientology? As Scientology stands for freedom, those who don't want freedom tend to attack it. The Section investigates the attacking group's individual members and sees that the results of the investigation get adequate legal action and publicity.

The mechanism employed is very straightforward. We never use the data to threaten to expose. We simply collect it and expose.

Experience with the section will show that very sordid motives lie behind such attacks and that individuals of the attacking groups have a very great deal to hide. Thus the section always has a huge quantity of matters to be discovered and is not likely to run out of cases to investigate, providing only that it does not depart from this formula:

1. Note what public or private group is attacking Scientology.
2. Get a project warrant from the Advisory Council Area or WW to investigate it.
3. Collect as many case histories as possible on the individuals of that group, specializing on those that can be led to criminal prosecution by state or world agencies.
4. See that enough of the data is made available to the state or world agencies to obtain convictions.
5. See that excellent press coverage is given the disclosures over as long a period of time as possible.
6. See that HCO and Scientology are given full credit for protecting human rights and liberty.

If there is no variation in the above formula and if serious departures or private vendettas do not enter in, and if all evidence continues to be honest and none of it framed, the section and Scientology will prosper.

All investigators, once they have passed their rigorous screening and have been employed, may look over the organization, its papers and files and satisfy themselves that we ourselves are not trying to hide anything and are exactly what we say we are and do exactly what we say we do.

Operating from this platform of confidence, the investigator can be much more effective.

Successfully experiencing Scientology processing can heighten the confidence even further.

PROCEDURES

Standard intelligence procedures are used.

The section has a file for each project and files by names of individuals within that project. The names are cross indexed, etc.

Public solicitation for cases of injury to the rights or liberty concerned with that project can obtain leads.

Every project should be the subject of a case form made up to contain details necessary for filing and follow up.

Anyone writing in a complaint is then sent a copy of the form to fill in so that the vital data can be weeded out and the importance of that complaint seen at a glance. The pattern of the form is based on the data needful to get a conviction.

Such a form is always sent back with a covering letter stating it is all in confidence, etc, making the plaintiff feel safer in answering.

However lists of names of plaintiffs are procured, each becomes the subject of a filled form.

The more fruitful of such forms are followed up by individual investigators. These obtain the data necessary for a conviction of the individual complained about who is a member of the attacking group.

Only copies are ever given state agencies or the police. Originals are always held.

The usual precautions against libel, slander and false arrest are taken.

Projects must be studied for legal liabilities by the Legal Section before being commenced upon. But no project may be stopped by the Legal Section - their whole function is to find how to make it safe.

No act which will make an investigator liable to criminal prosecution may be ordered.

The section should note that press and the public are interested in murder, assault, destruction, violence, sex and dishonesty in that order. Investigations which can uncover these factors in the activities of individuals of a group attacking Scientology are valuable in the degree that they contain a number of these factors. The more factors a case contains the more important the case is. The idea is that the press feeds on these factors and we feed them someone else's. It will be found that our own Scientology groups contain so few of these they have to be invented about us. We need never invent them in the attacking group. They will be found to be there.

Associating the attacking group's activities with reprehensible groups in the past by using similar descriptive words will be found very effective. For example, if the word "white" has been made hateful to the public by some past criminal group we use "white" in our descriptive terminology concerning the group that is attacking us and whom we are investigating. "Psychiatric blood sports" is an example, blood sports being lately very much derogated.

The work of the section is usually tied to committees in human rights or such committees as organized by the International Executive Division.

The action of the section is more than Scientology self-protection. As one holds up an image of freedom to the public the more suppressive groups and individuals in the society attack it. Hitler, for instance, would have attacked any group just because it was free. In that way we then get rid of suppressive groups by investigation and disclosure.

Section investigators would do well to study the technology on suppressive persons.

Such attacking groups with which the section will deal derive their power from pretense and secrecy. It will be seen the power vanishes under calm investigation, particularly when it is well known to them that we are investigating.

HCO POLICY LETTER OF 1 SEPTEMBER 1969R

Remimeo

Legal Dept Office which no longer exist as a
post and network.)

COUNTER-ESPIONAGE

(Ref: HCO PL 12 Oct 82 CORRUPT ACTIVITIES
 HCO PL 14 Mar 82 FINANCIAL IRREGULARITIES
 HCO PL 13 Jan 83 THE BUSINESS OF ORGS)

No country or company has ever solved espionage and intelligence actions within it.

Industrial "espionage" is a very prevalent activity.

As our policy letters and materials are often found in wrong hands we must be subjected to internal espionage on occasion. We certainly are subjected to intelligence externally.

Intelligence actions internally in a company or organisation take five main courses:

1. Theft of documents or materials.
2. Executive actions contrary to the company's best interests if not outright destructive.
3. Administrative enturbulation including messing up files, addresses, facilities or communications.
4. False reports or false advices to customers or staff to bring about apathy or defeatism.
5. Perversion or corruption of the product (in our case, technology).

Motives

Financial gain is the primary motive in almost all cases of infiltration.

A very experienced European Intelligence officer stated that he had never failed to buy any person he had ever approached in any government, and this in a lifetime career in the field of espionage.

Governments and many companies have amongst them people who are in or who can be forced into heavy financial trouble.

By offering surprisingly small sums of money, any one of the five actions listed above could be effected by an enemy.

The practice is so common as to be commonplace but the harm done is all out of proportion to the effort employed.

A Solution

Guarding against infiltration is a vital action for survival and nations and companies spend huge sums on counter-intelligence, the action of foiling the efforts of enemies.

In studying the extensive literature of this subject an inexpensive effective solution has occurred to me which I do not think has ever been used.

If finance is the motive, then of course one should reward successful Counter-Intelligence actions.

An enemy seeks those in debt or forces persons into debt so they can be bought. If the person being baited were assured of a safer reward, the person would usually incline toward his own country or company.

The Placard

An org should therefore display in an area mostly frequented by staff, near the staff bulletin board or in the W.C., but not necessarily to the public, a placard worded somewhat as follows:

REWARD

As Industrial espionage is an ordinary occurrence in most companies, the staff is requested to be alert for

1. Any theft of documents or materials.
2. Orders or directions which will result destructively.
3. Any disturbance of files, bills or addresses.
4. False reports or advices to staff or customers or preached defeatism.
5. Willful corruption of tech.

Anyone detecting any of the above should report the matter at once to the Reports Officer, Religious Technology Center with names and full particulars.

Should further investigation result in the disclosure and apprehension or arrest of persons attempting willful harm to this organisation

A REWARD OF \$1,000.00

will be paid by the International Finance Office.

Should a staff member be approached and asked to attempt any of the above actions he should promptly seem to agree, should accept any money offered (which he may keep) and should quickly and quietly report the matter to the Religious Technology Center so that the instigators can be traced and arrested, at which time the \$1,000.00 reward will be paid after the apprehension, arrest and conviction of the person(s) attempting the willful harm to this organisation.

Another reward of \$400.00 will be paid any staff member or person in the field who should hear of or be subjected to any provocative anti-organisation activity in the field and who then forwards sufficient evidence of the criminal background and connections of the provocative person in such form that it may be given to the police by the Religious Technology Center.

Should any staff member have knowledge of any financial irregularity within the organisation and furnish proof of it to the Int Finance Office and RTC promptly along with evidence sufficient to successfully prosecute he shall be given a reward equivalent to 25% of all monies recovered or \$1,000.00 which ever is less.

BLACKMAIL

Any person or agency attempting to accomplish any of the above five points by reason of attempted BLACKMAIL of a staff member is liable to arrest. In this case the reward is also paid to the staff member on the arrest and conviction of those attempting the blackmail.

Staffs are requested to cooperate fully to help continue to make an org and area a safe environment from which freedom may expand.

Alertness is the penalty we pay for living in an aberrated society.

Truth cannot live in an atmosphere of deceit.

Religious Technology Center®
(address)

The amount of the rewards may be changed from time to time. It is the responsibility of the Int Finance Office to update the amount of the rewards in the future.

Org's Protection

Our Dianetics and Scientology orgs are fortunate in that where tech is "in" very little infiltration can occur since persons cannot benefit from things they try to harm.

Our primary protection is "in" tech and well processed staffs. It follows that when tech is out, ethics will be found out also.

Persons who have no or little case gain are the only ones we have any trouble with.

No other organisation and no country has as good a chance as ours to be free of infiltration.

One other thing worthy of note in connection with Counter-Intelligence is that countries and companies which do not have a high cause, a high allegiance, have need of tremendous counter-intelligence forces.

If we keep our integrity high and give staffs good and valuable government, we will have maximum Counter-Intelligence effectiveness with minimum effort since our staffs would themselves militantly defend their executives and the org.

Attached are several checklists for use by HCO and OSA/ DSA personnel in the handling of security risks and security related situations. They are intended as a guideline of actions which can be taken which are in alignment with the above policy letters. The checklists themselves do not supplant policy which should be used as the guiding factor in handling such matters.

The point of using them is that proper coordination exists between HCO/Snr HCO and OSA and most importantly that the situations are actually handled.

The checklists are to be kept by I&R Chfs, HASEs, DSAs, Snr I&R Int, Snr PCO Int, Staff Security Officer OSA INT/CONT, Security Chf Snr HCO INT, OSA Invest terminals, and Security personnel where posted, for use by them. This checklist should be implemented by any one of these terminals who discover that such a situation exists in an org or in the field that requires immediate coordination and handling.

The types of security situations which may come up on HCO/OSA lines are described in the policy references listed above and are generally listed in SO ED 4234 INT as items a-o, which are listed here as follows:

- a. PTS Type C situations with public where an external source is threatening legal or pushing someone to threaten legal.
- b. Illegal PCs category number three, where a person has connections to an outside intelligence agency of some sort.
- c. Any threat of legal action or any other attack from a public against the organization.
- d. Squirrels or declared individuals who are pushing onto org lines or lines of staff or public in good standing, either covertly or overtly.
- e. Newspaper reporters, psychiatrists, psychologists, police, intelligence agency connected personnel trying to get on org lines.

- f. Persons PDHed to do destructive actions against Scientology® and those who PDHed them.
- g. Attempted suicide cases or PTS Type IIIs and any external or antagonistic connections to them.
- h. Criminals or persons with a criminal record who are trying to get on org lines.
- i. Institutional and shock cases trying to get on lines.
- j. Persons who have come to investigate Scientology for news stories or any other reason.
- k. Members of squirrel groups or suppressive groups, or past members of such groups.
- l. Incidents of theft, break-in or physical attacks on Scientology persons or property.
- m. Persons who are encouraging Scientology public or staff to take illegal and destructive actions.
- n. Persons engaged in mutiny or outright sabotage or any of the actions described in HCO PL 1 Sept 69, Rev. 24.9.83, COUNTER ESPIONAGE.
- o. Persons who are members or connected to members of Anti-Religious groups organized to attack or persecute religions.

In addition to the above, the checklists give a guideline for dealing with any instance of an illegal PC per HCO PL 6 Dec 76RB, ILLEGAL PCs, ACCEPTANCE OF or troublesome source as per HCO PL 27 Oct 64R, POLICIES ON PHYSICAL HEALING, INSANITY AND SOURCES OF TROUBLE found on org lines, serious enough to present a security risk to the organization; or any attempted enemy infiltration detected on Scientology lines.

There are 4 separate checklists provided:

1. One which lays out the internal actions to be taken by HCO.
2. One which lays out external actions to be taken by OSA/DSA personnel.
3. A specialized checklist for dealing with PTS Type III cases found on org lines.
4. A specialized checklist for handling of a theft of org property or material.

When a checklist is logged out to a situation, each step, upon completion, should be initialed with date and post title of the person executing the actions. Once the matter is handled the checklist can be filed with any folders related to the matter.

SUPPRESSIVE PERSONS AND SUPPRESSIVE GROUPS LIST

This issue is the list of declared suppressive persons and suppressive groups. It is for your use to safeguard the lines of your Org or Mission and to ensure that these individuals or members of these groups are not connected to or on lines of your Org or Mission in any way. Reference: HCO™ PL 23 December 1965RB, SUPPRESSIVE ACTS, SUPPRESSION OF SCIENTOLOGY AND SCIENTOLOGISTS.

Updates of this list will be regularly circulated as per HCO PL 29 June 1968, ENROLLMENT IN SUPPRESSIVE GROUPS.

In case you have knowledge of any of the listed people being on lines in your org or on lines with any other Scientology® group or Scientologist™, please immediately let me know by telex with all data you have.

Also, in case you have any data that seems to conflict with any person being on this list, or any person that should be listed but is not, please contact me by telex with full specifics.

HCO™ ETHICS ORDER

EO#716

16 NOV 92

TO: ALL ORG HCOs
ALL MISSION HCOs
THOSE CONCERNED

SUPPRESSIVE PERSON DECLARE

FRANK OLIVER

Frank Oliver of Miami, Florida is hereby declared a Suppressive Person.

Frank blew from his post of Invest Officer. Although attempts were made to get Frank to apply ethics tech to himself, he would not arrive to the org regularly and remains blown.

While on post, Frank would fail to complete urgent cycles he was assigned. He would also fall out of comm with his senior giving no data as to his whereabouts or what he was doing. This made it necessary for his senior to constantly bypass and handle his dropped cycles. Frank lied several times to his senior as to why he was not arriving for post.

An investigation into Frank's area found that Frank had taken confidential files prior to his blow without authorization. This act delayed an important project until the files were finally retrieved.

Therefore, Frank is guilty of the following Eccleastical High Crimes:

1. Where a person is secretly planning to leave and making private preparations to do so without informing the proper terminals in an org and does leave (blow) and does not return within a reasonable length of time, an automatic declare is to be issued.

Any certs or awards that Frank may have are hereby cancelled. Any trademark license that Frank may have signed with the Church is also hereby cancelled and he has no rights to use any of the marks in any manner whatsoever. Frank's only terminal is the International Justice Chief via the Continental Justice Chief. It is hoped that Frank does come to his senses and seeks the mercy that the Church offers. If so, he should apply steps A-E laid out in HCO PL 23 Dec 65RB, SUPPRESSIVE ACTS, SUPPRESSION OF SCIENTOLOGY® AND SCIENTOLOGISTS™.
